Посібник містить завдання тестів ЄВІ з блоку «Іноземна мова», лексичні вправи, граматичні таблиці та тестові завдання. Посібник включає 11 модулів (Module) за темами People (Appearance. Character); Family & Social Life; Natural World; Environment; Education; Work. Jobs. Employment; Food. Culture (Art. Music); Shops & Services; Travelling & Tourism; Sports. Health; Science & Technology; State & Society; Houses & Homes. Кожен Module містить Test у форматі ЄВІ за однією з тем та Vocabulary Focus з тренувальними лексичними завданнями. До Grammar Focus входятя граматичні таблиці та тренувальні граматичні завдання.
У збірнику наведені правильні відповіді до кожного завдання.

Загальна кількість завдань кожного тесту – 42.
Test складається з двох частин: «Читання» та «Використання мови», та містить 6 завдань, серед яких:

1. Завдання на встановлення відповідності (№ 1–5, 11–16). У завданнях пропонується підібрати заголовки до текстів/частиин текстів із наведених варіантів; твердження/ситуації до оголошень/текстів; запитання до відповідей або відповіді до запитань. Завдання вважається виконаним, якщо учасник зовнішнього незалежного оцінювання встановив правильну відповідність і позначив правильний варіант відповіді у бланку відповідей A.

2. Завдання з вибором однієї правильної відповіді (№ 6–10). До кожного завдання наведено чотири варіанти відповідей, з яких лише один правильний. Завдання вважається виконаним, якщо учасник зовнішнього незалежного оцінювання вибрав і позначив правильну відповідь в бланку відповідей A.

3. Завдання на заповнення пропусків у тексті (№ 17–42). У завданнях пропонується доповнити абзаці/речення в тексті реченнями/частиинами речення, словосполученнями/словами із наведених варіантів. Завдання вважається виконаним, якщо учасник зовнішнього незалежного оцінювання вибрав і позначив правильний варіант відповіді в бланку відповідей A.

Схеми оцінювання завдань сертифікаційної роботи з іноземної мови:

1. Завдання на встановлення відповідності оцінюється в 0 або 1 бал: 1 бал за правильно встановлену відповідність; 0 балів, якщо правильної відповідності не встановлено або відповіді не надано.

2. Завдання з вибором однієї правильної відповіді оцінюється в 0 або 1 бал: 1 бал, якщо вказано правильну відповідь; 0 балів, якщо вказано неправильну відповідь, або вказано більше однієї відповіді, або відповіді не надано.

Завдання на заповнення пропусків у тексті оцінюється в 0 або 1 бал: 1 бал, якщо вказано правильну відповідь; 0 балів, якщо вказано неправильну відповідь, або вказано більше однієї відповіді, або відповіді не надано.

Максимальна кількість тестових балів, яку можна набрати, правильно виконавши всі завдання тесту – 42 тестових бали.

Family & Social Life
Task 1

Read the text below. Match choices (A – H) to (1–5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

You Are What You Think You Are

1. __________
   It is very common for teenagers to have a negative image of their own bodies. They insist they are hopelessly ugly, no matter how much their parents and friends tell them otherwise! Magazine problem pages and Internet blogs are full of agonised accounts. The young people who write them are convinced they are unattractive and therefore unloved and rejected by others.

2. __________
   Why do teenagers see themselves in an unflattering way? The fact is, puberty has a lot to do with it. During your early teens, the body is preparing itself for adulthood. New chemicals are moving around the body as it adjusts to adult hormone levels. The body alters its shape, sometimes resulting in puppy fat. Skin problems such as acne are also common. Teens are affected psychologically too. They become confused and anxious about their changing appearance. This in turn can lead to feelings of insecurity and low self-esteem.

3. __________
   Nor is the situation helped by the media. Young people are bombarded with images of the ideal body. Top fashion models in glossy magazines are all far taller and skinnier than the average woman. They have their hair and make-up done professionally. After a fashion shoot, magazine editors have the photographs airbrushed before they are published to give the models a flawless complexion. Male actors in epic films flex beautifully toned rippling muscles. But more than likely, they have had them digitally enhanced, or “photoshopped”, as they call it in the trade. Not to mention the fact that many celebrities choose to have cosmetic surgery done to enhance their appearance. None of this reflects a realistic body image, so it’s no wonder adolescents are made to feel inadequate and unsure of themselves.

4. __________
   The good news is that, however dissatisfied you are with your looks, the chances are it’s only temporary! Those extra kilos and that spotty skin usually disappear by themselves in time. While your body is sorting itself out and “settling into” its final form, you need to ride out the change! Resist the temptation to compare yourself with your peers. This is easier said than done when you are the tallest girl in your class or the only boy who has started growing a beard. You tend to feel the odd one out and may even get teased or bullied. Just remember that although teens’ bodies change at different speeds, everyone ends up at more or less the same place in the end!

5. __________
   It’s important to realise what things you can change about yourself and what things you can’t. Correct diet and exercise can do wonders for your appearance. Having your hair restyled, your nails manicured or your teeth whitened will also help boost your self-confidence. The things you can’t alter, like your height or your shoe size, should be seen as strengths and not weaknesses. They are, after all, the features that make you a unique individual!

A. Physical traits can reveal your personality
B. Many teenagers worry about their appearance
C. Adolescence is the time that influences your mental well-being
D. People who post selfies are more open to new experiences
E. Teens develop at a different rate
F. Fashion models have their appearance improved artificially
G. An increasing number of teens change their image through plastic surgery
H. Social media use has no impact on self-esteem, body image and body dissatisfaction

Task 2
Read the text below. For questions (6–10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Why Fathers Want to Look after the Baby

One of the most extensive surveys of fathers has now shown that, far from the stereotype, most men would like to share childcare duties with their partners or wives.

The survey made by the Equal Opportunities Commission shows a modern type of father: the New Dad. He takes part in day-to-day childcare and does not mind helping with the vacuuming and washing-up – if only when his partner asks him to. The EOC interviewed sixty-four fathers and their partners about their home and work life. Most fathers agreed that it was important to ‘be there’ for their children for key events such as school sports day, their first appearance in the school play and for at least one meal a day. Many agreed that parenting classes would be a good way to give them more confidence around the home.

Based on the survey results, four types of fathers were defined, from the traditional type of dad to the perfect New Dad, who is as much involved in taking care of the children as the mother. The survey found that the majority of men were somewhere between these two types.

In the first category comes Enforcer Dad, the old-fashioned disciplinarian who does not see himself as involved in the day-to-day care of his children. He sees his responsibilities as setting clear limits for them and being a role model. Most fathers do not see this as their only role.

The two biggest categories are Entertainer Dad and Useful Dad. Entertainer Dad is at his best keeping his children laughing while his partner gets on with household chores and arranging the children’s school and extra activities. Useful Dad is willing to help out around the house, even though he expects the mother to be the “team leader” in all things domestic.

Finally, and probably every woman’s dream, is Fully Involved Dad. He is equally engaged in running the home and the family, and sees the role of the father and the mother as practically identical. Fully Involved Dads adjust their work arrangements to their partners’ professional duties. “I do have definite childcare commitments,” said one father in this category. “There are certain times or occasions where it is non-negotiable and I just leave the office on time.”

Julie Melior, chairwoman of the EOC, said that fathers were still not given enough flexibility at work and mothers would feel fully supported only if employers treated (and paid) both sexes equally. “Mums and dads should be able to choose how they want to share the responsibilities of bringing up children and working outside the home,” she said. “But until we have equal pay, decent childcare and more opportunities to work flexible hours, many fathers will continue to find it hard to be there for their children and many women will continue to be disadvantaged at work. This is not necessarily the best solution for parents, children or employers. Equality at work or home depends on both mums’ and dads’ family responsibilities being acknowledged,” Melior said.

6. Which of the following topics does the headline of the article reflect?
A. Fathers can choose how they want to share the responsibilities of bringing up children
B. Fathers should be encouraged to participate in childcare more actively
C. Fathers are ready to participate in taking care of children
D. Working women want their partners to take over some childcare responsibilities
7. Why would many fathers like to attend parenting classes?
   A So they can be more confident in dealing with domestic issues
   B So they can learn how to do day-to-day childcare
   C Because they think it's important to be involved in the day-to-day care of children
   D Because they want to attend important school events

8. How do Enforcer Dads view their role in childcare?
   A They don’t see childcare as their responsibility
   B They teach their children discipline by setting an example for them
   C They keep children amused while their partner gets on with housework
   D It's important for them to be involved in the day-to-day care of their children

9. How do Fully Involved Dads find time to share childcare responsibilities with their partners?
   A They fit their work commitments to their partner’s arrangements
   B They often leave the office early
   C They run the home and the family, so their partners can focus on their professional duties
   D They think it's their partner's responsibility to negotiate flexibility at their workplace

10. What does Julie Mellor think employers should do?
    A They should give women more support so they can take on more of the childcare responsibilities at home
    B They should allow parents to work from home so they can look after their children
    C They should pay women more because they are often disadvantaged in the workplace
    D Employers should provide both parents with equal pay and flexible working hours

Task 3

Read the texts below. Match choices (A – H) to (11-16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

Dealing with Difficult People

11. Gossips might seem harmless, but when they're talking about you, it can be extremely upsetting and embarrassing. Gossips take great delight in passing on bad news: “Did you hear about poor ...” They are not that worried about the truth either. As long as it sounds good, they’re more than willing to pass the story on, usually exaggerating it in the process. The gossip will often try to find out what you know in order to tell someone else later on, but avoid getting involved. If necessary, be direct: “Sorry. I'm just not interested in gossip!” Gossip usually dies down quickly when no one wants to listen or contribute.

12. The steamroller can be very hostile and aggressive and will walk all over you without a second thought. They may shout, make threats and even physically intimidate their victims to get what they want. It is essential to be calm when dealing with a steamroller so that they don't get even angrier. Don’t shout back or appear scared or nervous as this is what they want - for you to be afraid of them. Let the steamroller see that you take them seriously, even admit they may have a point, but be assertive and firmly state your case. Sometimes you have to stand up for yourself and not back down.

13. The know-it-all thinks they know it all! They can have valuable opinions to offer, but the problem is, they can't stand being wrong. The know-it-all tends to dominate conversations and often tries to make other people feel small because of their lack of knowledge. One way to deal with these kinds of people is not to get involved in whatever they are talking about: stay neutral or admit to seeing both sides of an issue. Don’t forget that the most important thing for know-it-alls is winning an argument. If they try to drag you into one, let them know that you couldn’t care less about winning. They’ll soon get bored if they can’t show off!

14. The whinger complains about absolutely everything! It doesn’t matter how trivial or bizarre the complaint (“The ice cream was far too cold!”), the whinger will go on and on about it as if it’s the end of the world. They see the downside of everything and dismiss solution you come up with. The problem is that deep
down they love moaning. One way to handle a whinger is to agree with them completely: “You’re absolutely right. I don’t know how you put up with it all.” Whingers often just want a little bit of sympathy; once they get it, they should complain less.

15. No matter what you do, you cannot get a word in edgeways; the chatterbox talks on and on ... and on! These people are sociable and often have big hearts, but they don’t listen to what you have to say and as a result it’s impossible to get anything done around them! Try taking control by interrupting them firmly and saying something like “Wait a minute, let me ask you a question about that.” You can also try listening to these people for a while – after all, they may just be lonely – and then say, with a smile, ‘Ok, well nice talking to you but I really have to get back to this now,’’ and hope they get the message!

16. When a drama queen stubs a toe, it’s a life-threatening injury, but when they find a plaster it’s as if they’ve won an Oscar! They exaggerate everything that happens to them and share it with the world through tears of pain and joy. The thing to do is react as little as possible. By taking an interest in their latest triumph or tragedy, you are just encouraging them to keep blowing things out of proportion.

Which person/ people...

A loves/love having a good time?
B does/do not let you take part in the conversation?
C is/are easily disorganized, unable to concentrate?
D grumbles/grumble about everything and makes/make things seem worse?
E could be made worse by your behaviour?
F wants/want you to feel less important?
G should you refuse to listen to?
H gives/give excessively emotional performances or reactions?

Task 4

Just the Four of Us

If we are all so unique, why is it that we are always trying to sort people by personality type? From the beginning of time, man has been putting people into categories by analysing their similarities and differences; and the number and variety of classifications of personality types is impressive to say the least.

One of the most commonly followed methods of classification divides humans into four groups. The theory has its roots in antiquity and is based on the four natural elements: earth, air, fire and water. Over time, various forms of this basic theory developed. The ancient Greek physician Hippocrates believed that human emotions were caused by fluids in the body, which he called “humours”. According to him these humours were responsible for the health and personality of an individual. He (17) _________. He suggested the sanguines, for example, had an excess of blood, were extrovert and made friends easily, but were often late, forgetful, and sometimes sarcastic.

This theory achieved great success and dominated Western thinking for over two thousand years until the 1700s, when physicians proposed the idea that people’s moods were affected by chemicals in the blood. Despite the decline in popularity of the theory of fluids, a large number of modern-day experts believe in the idea of four types of personality.

In fact, to a large extent, only the names (18) _________. Nowadays, the sanguines are known as extroverts, but they actually retain much of the same characteristics described by Hippocrates. They are outgoing and energetic and love to party, but are not punctual, can be messy or disorganised, and prone to carelessness.
Another modern-day category that many psychologists use is the analytical type, or what some of us refer to as the “gadget-man”. The analytical personality is the one who likes to have every “I” dotted and every “t” crossed. Punctuality and order is of prime importance to them. They are neat and (19) _________. However, they tend to think too much and can be gloomy and irritable at times.

A very common label given to another group of people is the dominant or pragmatic type. As the name suggests, the dominant personality type (20) ___________. They might listen to others’ opinions out of courtesy but they like to do things their own way. They are hands-on people and like to get the job done.

Finally, there is the amiable type (21) ___________ and will do anything to avoid conflict and arguments. They are rarely ambitious because they tend to put others first far too often. They are loyal, trustworthy and helpful and find it very hard to say no.

Studying personality types may not be a pure science. However, it may help to appilcate our differences. We all have various strengths and qualities and are valuable members of society. (22) ___________may not always seem very wise but at the same time it does develop an understanding of different characters and shows that everyone should be treated with care and respect.

A organized and have enormous self-discipline
B who loves peace and quiet
C divided them into four categories: choleric, sanguine, melancholic and phlegmatic
D is not the easiest of tasks
E is self-confident and authoritarian
F given to the categories
G that moods were caused by fluids in the body
H putting people into categories

Task 5

Read the text below. For questions (23–32) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Many people claim to be able to know when someone is lying. According (23) ___________. popular belief, all you have to do is look at a person’s body language; when a person is lying he becomes nervous and fidgety, touches his nose, and bites his nails. However, a researcher at Portsmouth University, England, has arrived at an entirely (24) ___________ conclusion. Dr Samantha Mann carried (25) ___________ research on the behaviour of suspects who had given (26) ___________ statements in police interviews. Mann discovered that liars actually stay quite (27) ___________. This is because they are aware that people are looking for body language that could suggest they are lying. Therefore, liars actually touch their noses 20% less than people who tell the truth. The same (28) ___________ for eye contact. While it is generally thought that liars (29) ___________ eye contact and blink rapidly, in reality, people who are lying (30) ___________ sure to maintain eye contact and control their blinking. With the findings of her research in mind, Mann claims that the best way to (31) ___________ a liar is to look for people who are trying too hard to (32) ___________ truthful.

### Task 6

Read the text below. For questions (33–42) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

**Teens Going Under the Knife**

Most teens love mirrors and spend hours in front them (33) ________ with hairstyles, makeup and fashion. An increasing number of them each year (34) ________ trying to change the image they see through plastic surgery. In (35) ________ United States alone, the number of teenagers undergoing plastic surgery (36) ________ since 2002 with the most popular procedures being rhinoplasty, also known as a “nose job”, and breast enlargements. (37) ________ openly discuss what procedures they have done and (38) ________ even proud of it. They are actually famous just for how good they look or for their number of plastic surgeries. Parents are more accepting of such procedures as many of them or their friends have undergone cosmetic improvements. For those parents who can’t afford it, many go into debt to finance the surgery by taking a loan. (39) ________ most adults have plastic surgery to improve their looks, young people tend to have surgery to fit in with their peers. When they don’t and have a body part that is different such as a large or unusual shaped nose, they are often (40) ________ and even bullied for (41) ________ different. Usually the social problems come from their low self-esteem and how they feel about themselves than how they look. In pursuit of happiness many young people are prepared to go under the knife and put (42) ________ with often terrible pain, not to mention the risks associated with surgery.

Module 2
Natural World.
Environment
Task 1

Read the text below. Match choices (A – H) to (1–5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

The Most Endangered Wolf in the World

1. __________
   From 2002 to 2014, the wild red wolf population consistently numbered over 100 animals. But starting in 2012, the population began to decline due to actions taken by the North Carolina Wildlife Resources Commission (NCWRC). By 2015, the population had declined to between 50 and 75 animals, and by 2016 it had dropped to between 25 and 48 animals. It is widely believed that there are now fewer than 30 red wolves living in the wild. Scientists have warned that if current management practices continue, red wolves could once again be extinct in the wild by 2024.

2. __________
   Throughout most of the recovery program’s history, shooting by hunters was the leading cause of red wolf deaths, a fact attributed to the similarity in appearance between coyotes and red wolves. Despite this, in 2012 the NCWRC approved a temporary rule allowing the hunting of coyotes at night using artificial lights on public and private lands throughout North Carolina, including in the recovery area. In 2013, the NCWRC adopted a permanent rule that allowed coyote hunting without a permit during the daytime and with a permit at night-time in the recovery area. In response, in 2012 and 2013, AWI and others filed two lawsuits that successfully cancelled both these rules.

3. __________
   The threat connected with gunshot mortality (deaths) soon became less important than the numerous threats related to the US Fish and Wildlife Service’s (USFWS’s) own shifting red wolf management practices. In 2013, the recovery program was transferred from the jurisdiction of the National Wildlife Refuge System (NWRS) to the Ecological Services Program, 600 miles away from the recovery area.

4. __________
   As a result, starting in 2014, the USFWS not only began to neglect its red wolf recovery and management duties, but also started issuing permits allowing landowners to kill red wolves on private land. In 2015, one of the animals killed was a female red wolf, known to be exhibiting denning behaviour, who had previously mothered a total of 16 pups through four separate litters.

5. __________
   Given the small and declining number of red wolves, losing even one wolf has a huge influence on the species. The impacts are particularly dire when a mother wolf is lost, because it not only orphans her pups and likely leads to their deaths, but also eliminates the possibility for that particular wolf to contribute more litters to the population. Although red wolves tend to form pair-bonds for life, red wolves may interbreed or hybridize with coyotes, particularly when an adult is lost from a breeding pair close to the mating season.

A  The malpractice of the environmental agency
B  The legislative battle for the red wolf recovery
C  The way endangered species affect humans
D  Maintaining biodiversity in today’s world
The causes of the red wolf species becoming endangered
Significance of female species for the whole population of the red wolf
Habitat loss of the red wolf in North Carolina
The current population of the red wolf

Task 2

Read the text below. For questions (6–10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Wordworth’s Lake District

Two hundred years ago the English poet William Wordsworth wrote a poem that expresses a basic spirit of early English Romanticism. It was Thursday, 15 April 1802. William and Dorothy Wordsworth, the poet’s devoted, journal-writing sister, were walking home to Dove Cottage in the Lake District. The wind was fierce, but the Wordsworth siblings were used to striding long distances in foul weather. They were in the woods close to the water side when they first clapped eyes on a field of daffodils ‘fluttering and dancing in the breeze’.

What makes this poem an example of Romantic thinking? It isn’t just that Wordsworth chooses to write about a natural scene: it is the way he describes the scene as if it had human emotions. For him, nature is not merely a neutral mixture of scenery, colours, plants, rocks, soil, water and air. It is a living force that feels joy and sadness, shares human pain and even tries to educate us human beings by showing us the beauty of life.

Wordsworth’s home. Dove Cottage, is now one of the most popular destinations in the Lake District. You can go on a tour of the garden which William planted with wild flowers and which survived in his backyard even after they disappeared from the area. ‘He always said that if he hadn’t been a poet, he would have been a terrific landscape gardener,’ says Allan King of the Wordsworth Trust, the organisation that looks after the cottage and gardens.

The Lake District in the north-west of England becomes particularly crowded during the summer months with tourists and ramblers eager to enjoy the region’s majestic valleys, hills and sparkling lakes. Wordsworth himself was far from keen on tourists, which was quite apparent. He wanted outsiders to admire the local sights he enjoyed so much, but was afraid the district might be ‘damaged’ by too many visitors. He opposed the coming of the trains, and campaigned in the 1840s against a plan to link the towns in the area – Kendal, Windermere and Keswick – by rail.

The place near Ullswater, where Wordsworth saw the daffodils, is at the southernmost end of the lake. The lake is wide and calm at this turning point. There’s a bay where the trees have had their soil eroded by lake water so that their roots are shockingly exposed. You walk along from tree to tree, hardly daring to breathe, because you are walking in the footprints of William and Dorothy from two centuries ago. The first clumps of daffodils appear, but they aren’t tall yellow trumpets proudly swaying in the breeze. They’re tiny wild daffodils, most of them still green and unopened, in clumps of six or seven. They are grouped around individual trees rather than collecting together.

6. According to the article, Wordsworth’s poem
   A started the Romantic movement
   B was based on actual experience
   C was written while he was visiting his sister
   D was written after he had been lonely
7. What was the poet’s attitude to nature?
   A He believed nature had a character of its own
   B He felt nature was human
   C He thought nature could talk to people
   D He believed that we could influence nature

8. According to the text Dove Cottage
   A has gardens designed by a landscape gardener
   B has a wide range of flowers in its garden
   C receives a lot of visitors
   D has a very large garden

9. What does ‘which’ in paragraph 4 refer to?
   A the number of tourists who come to the Lake District
   B Wordsworth’s desire for outsiders to admire the local sights
   C the fact that Wordsworth was keen on tourists from far away
   D Wordsworth’s dislike of tourists

10. In what way is the scene different from what Wordsworth described?
    A All the daffodils are green and small
    B There are no daffodils by the lake
    C The daffodils are fewer and smaller
    D There are no daffodils around trees

Task 3

Read the texts below. Match choices (A – H) to (11-16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

**Environmental Awareness Day**

11. **Plumpton High School.** This school decided to arrange a variety of activities, some aimed at achieving a better understanding of environmental problems, and others designed to be of practical help. For instance, the school magazine brought out a special edition on the subject, full of articles and stories where pupils expressed their feelings about the threats facing our environment. The school also held a sponsored walk and handed over nearly £1000 to the World Wide Fund for Nature.

12. **Cresswell College.** The staff and students at Cresswell College held a meeting and discussed a number of suggestions. The most popular suggestion turned out to be the most practical one; it was decided that the local environment should be brightened up. Teams were sent out to plant flowers and young trees on areas of land in the neighbourhood. Senior students monitored the progress of species threatened with extinction and prepared a report on their findings. It was hoped that this would help publicise the problem.

13. **Grayner Institute.** This school had already been involved in some projects connected with the environment, though naturally efforts were increased for Environmental Awareness Day. For the last two years the school had been studying the effects of variations in climatic patterns around the world and how these can affect wildlife. A leading expert on wild birds was invited to come and give a talk about the dangers faced by these creatures. He explained the importance of the food chain and asked people to support local wildlife reserves.

14. **Halliwell Academy.** The pupils at this inner-city secondary school felt that the best way to mark Environmental Awareness Day would be to help people in the area understand how important the environment
is to them. One suggestion that was greeted with enthusiasm was to measure the levels of noise in Stanley Road, a busy local shopping street. The information was then placed on a website that the school had started. In order to give them a chance to see for themselves the problems facing some local species, the school took pupils to the coastal marshes of Easton. Many pupils reported afterwards that they had never realised how terrible the effects of pollution could be on coastal wildlife.

15. Albion High School. In an attempt to find out for themselves how serious environmental threats really are, the pupils decided to study the problem of pollution by making a survey, run by the science department, into air pollution in the local shopping centre. Pupils also prepared a campaign to ban cars from the city centre and reduce traffic congestion. They gained a lot of publicity for the school by cycling through the city and handing out brochures about the benefits of cycling and walking.

16. Doncaster College. A film about magnificent marine mammals, whales, which was shown to the whole school as part of Environmental Awareness Day, was received with great enthusiasm by pupils. Meredith Summers was invited to talk about how pollution can destroy buildings in the region. Following that, pupils decided to launch a campaign for the restoration of the medieval square in the city centre and asked local authorities to support them financially.

Which school ____________?
A  banned cars in the city centre and reduced traffic congestion
B  raised money to help an organisation
C  carried out a project about endangered animals and plants
D  provided online information about the environment
E  became better known after Environmental Awareness Day
F  spent a huge sum on the World Wide Fund for Nature
G  arranged a talk on pollution and local architecture
H  is following changes in general weather conditions

How to Stay Safe around Wild Animals

With summer being the busiest season for most U. S. national parks, the potential for run-ins with wildlife increases – and so do (17) ____________. Though most people imagine bears or bison are the animals (18) ____________, even small mammals can pose a risk.

“At the Grand Canyon, the number one reason people end up at the clinic is from squirrel bites,” says Kathy Kupper, a spokesperson for the U. S. National Park Service.

It’s illegal to approach, harass, or feed any type of wildlife in national parks, adds Kupper. “No matter the size, no matter how harmless or safe they appear.”

Between 2008 and 2015 in the United States, 1,160 people died in animal encounters, mostly (19) ____________, followed by venomous species such as hornets, bees, and snakes.

Though such incidents are rare, they can be made even rarer (20) ____________. The first and perhaps most important is (21) ____________. 
“If your actions cause a reaction from the animal, then you’re too close,” says Kupper. “And (22) _________ a selfie with wildlife, then you’re definitely too close.” Why people risk their lives for the ultimate animal selfie.

A by following a few basic guidelines  
B to watch out for  
C to preserve in nature reserves  
D visits to the emergency room  
E if you make  
F to give wildlife a lot of room  
G due to domestic animals such as dogs  
H if you can take

Task 5

Read the text below. For questions (23–32) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Climate Change or Global Health Crisis?

The climate crisis is also a health crisis. The same emissions that cause global warming are also largely responsible for polluting the air we (23) ____________, causing heart disease, stroke, lung cancer, and infections, and (24) ____________ every organ in our bodies. Air pollution is the new tobacco, causing as many deaths as cigarettes. And (25) ____________ it (26) ____________ us all, children, the elderly, pregnant women, and adults with weakened immune systems are the most (27) ____________ risk.

It is now common knowledge that smoking tobacco severely harms you and those around you. That is why the tobacco industry’s lobbying and advertising campaigns have been regulated around the world. Globally, we have (28) ____________ steps to safeguard existing health policies, and to force these companies to tell the truth: that their product kills.

The choice between phasing out fossil fuels and continuing on the current path is black and white – it is a matter of life or death. We either will decide to prevent seven million premature deaths per year by (29) ____________ our air and providing people (30) ____________ clean energy sources, or we won’t. We either will decide to prevent four million childhood asthma cases per year (31) ____________ traffic fumes, or we won’t. In any case, the lifetime health of a child born today will be (32) ____________ affected by the decisions we make about climate change now and in the years to come. That is why the World Health Organization has made climate change a top institutional priority.

Water Pollution

(33) ________ the beginning of civilization, water has been used to carry away unwanted refuse. Rivers, streams, canals, lakes, and oceans are currently used as receptacles for every imaginable kind of pollution. Water has the capacity (34) ________ down or dissolve many materials, especially organic compounds, which decompose during prolonged contact with bacteria and enzymes. Waste materials that can eventually decompose in this way are called biodegradable. They are less of a long-term threat to the environment than are (35) ________ persistent pollutants such as metals, plastics, and some chlorinated hydrocarbons. These substances remain in the water and can make it poisonous for most forms of life. Even biodegradable pollutants can damage a water supply for long periods of time. As any form of contamination (36) ________, life within the water starts to suffer. Lakes are especially vulnerable to pollution because they cannot cleanse themselves (37) ________ rapidly as rivers or oceans.

A common kind of water pollution is the effect caused by heavy concentrations of nitrogen and phosphorus, which are used by plants for growth. The widespread use of agricultural fertilizers and household detergents (38) ________ these elements has added large amounts of plant nutrients to many bodies of water. In large quantities, nitrogen and phosphorus cause tiny water algae to bloom, or grow rapidly. When the algae die, oxygen (39) ________ to decompose them. This creates an oxygen deficiency in the water, which causes (40) ________ death of many aquatic animals. Plant life soon reduces (41) ________ of open water. These events speed up the process of eutrophication, the aging and (42) ________ drying up of a lake.

Module 3
Education
Different Types of Schools and Education Systems

1. **Boarding school** students quickly learn how to perform many domestic chores and complete school assignments by themselves. They become experts at managing their time, money, and resources. They can focus better on their studies because television, video games, phones, and other distractors are limited. These young scholars usually perform better academically because they live in an environment that is conducive to learning. Boarding school students live and attend classes with people from a variety of cultures; therefore, they learn to appreciate and respect the differences in one another and live amicably.

2. **Charter schools** have the flexibility to teach students what they might need in the real world, especially those who are in high school. Charter schools can specifically look at trends and offer more targeted coursework on topics such as science, computer engineering, or environmental studies that wouldn't be offered at a traditional school. Other more holistic approaches to learning can be implemented as well, such as taking care of the environment and health-based curriculum to foster a child's whole self and not just traditional types of learning.

3. **Virtual Schools** removed the limitation of time and location, a common challenge in a traditional classroom. With uplift of these limitations, learners have the freedom to study and finish the coursework anytime, anywhere. Learners also have the freedom to engage with other on classroom topics, do the assignment, absorb class content, or take exams at a time or duration that best fits their schedule. Another virtual classroom advantage that many students find to be very interesting is the sharpening of one's digital skills. While increasing your skills and knowledge in your area of study, you are the same time sharpening your digital skills on some of the most sophisticated online learning solutions.

4. **The unique quality of a magnet school** is that they usually have a special curricular focus. Magnet schools give students the chance to attend schools that focus on themes or career areas of special interest to the student. Common themes include STEM (Science, Technology, Engineering, and Math), the arts, and vocational or career paths. Each magnet school offers a unique and challenging curriculum as well as the supports that students need to expand their interests, talents, and passions. Magnet schools emphasize an area of study or a method of teaching.

5. **Montessori schools'** approach to the education is unique in that it is based on the observation of the child and following his or her abilities and interests. The method is based on the freedom of the child to explore and learn, mostly, through self-direction. The Montessori philosophy recognizes that each child learns in a different way, so every learning style is accommodated. Students proceed through the curriculum in their own time when they are ready. All this learning occurs under the guidance of the teacher who develops an individualized learning plan for every student.

A  Innovative curriculum
B  Studying and living at school
Specialized education
Homeschooling
Individual approach
Distant online education
Faith schools
Language immersion schools

Task 2
Read the text below. For questions (6-10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Essential 21st Century Skills for Today’s Students

Problem Solving
Students need the ability to solve complex problems in real time.
Why it is important: In the future, complex problems that we cannot even conceive right now will be everywhere. As society advances, so will the complexity of its manageable conflicts. The more students focus on their ability to devise effective solutions to real-world problems, the more successful they will become. Problem-solvers can work independently from higher supervision. They are initiative takers and enjoy risk, and they are not afraid to get their hands dirty and make mistakes. They also learn from those mistakes, and habitually debrief their processes to create more efficient and economical solutions.

Creativity
Students need to be able to think and work creatively in both digital and non-digital environments to develop unique and useful solutions in imaginative ways.
Why it is important: Digital students are in a constant state of stimulation and neural development with technology use. They are natural producers and consumers, or prosumers, of information. Ask any student about what they like to create and you will get a myriad of different answers. They are constantly searching for ways to express themselves and their uniqueness. Through social media, they display this creative edge and are given constant and instantaneous feedback from their peers. This same level of creative power is used as they face interesting challenges and figure out how to meet them with ingenuity and vision. This is why Creativity is one of the Essential Fluency skills.

Analytic Thinking
Students need the ability to think analytically, which includes proficiency with comparing, contrasting, evaluating, synthesizing, and applying without instruction or supervision.
Why it is important: Analytic thinking means being able to use the higher end of Bloom’s Digital Taxonomy or higher-order thinking skills (HOTS).
Analytic thinking is a significant part of what makes up Information Fluency.
Analytical thinkers see data and information in many different dimensions, and from multiple angles. They are adept at conceptualization, organization and classification, and knowledge synthesis. These types of skills are invaluable because they allow students to deal practically with problems of a social, mathematical, and scientific nature. It empowers them to make effective and levelheaded decisions in their lives and relationships. It is easy to see why critical and analytical thinking skills are important to success beyond school.

Collaboration
Students must possess the ability to collaborate seamlessly in both physical and virtual spaces, with real and virtual partners globally.
Why it is important: Students of the digital age are social by nature. They text, post, update, share, chat, and constantly co-create in technological environments with each other. When they are unable to do this in school, they become disengaged and unattached to their learning.
Connection and collaboration with others are essential not only to students’ learning but to their mental and emotional health.

The work forces of the future (and even our present day) are globalizing due to the Internet. It is now the norm to communicate and market for global demographics instantaneously and effectively. An organization’s business partners are now halfway across the world, and yet they meet and work with each other every day.

**Communication**

_Students must be able to communicate not just with text or speech, but also in multiple multimedia formats. They must be able to communicate visually through video and imagery as effectively as they do with text and speech._

Why it is important: Communication is a broad term that incorporates multi-faceted levels of interaction and sharing information. Students love to communicate using technology. This is an essential part of Media Fluency. However, it is more than just being able to effectively use digital media. It is about personal interactions as well.

Responsible communication practice puts forth students’ best representation of who they are as individuals in every relationship and alliance they make in their lives. Whether talking face-to-face, blogging, texting, or creating a visual product, their values and beliefs are defined by how well they communicate with others.

6. **Solution Fluency** ________.
   A focuses on to accurately assessment a situation and arrival at a positive solution without supervision
   B empowers students to see concepts in a different light, which leads to innovation
   C is an interaction that goes hand-in-hand with the mindset of global awareness
   D means getting students to work together, achieve compromises, and get the best possible results from solving a problem

7. **Creativity means** ________.
   A the ability to analyse, think independently, process information responsibly
   B the ability to come up with new solutions, using unfamiliar resources
   C the ability to communicate and work effectively together
   D the ability to raise awareness of global challenges

8. **Analytical thinking is** ________.
   A the ability to break out of stereotypes to face life situations by coming up with new solutions
   B willingness to accept behaviour and beliefs that are different from your own, although you might not agree with or approve of them
   C a critical component of visual thinking that gives one the ability to solve problems quickly and effectively
   D the ability to identify and study options and choose appropriate ones by considering personal and public interests

9. **Collaboration is** ________.
   A the various methods of sending information between people and places
   B a situation in which someone is responsible for things that happen
   C the ability to make something new or imaginative
   D the act of working together with other people to create or achieve something

10. According to the text communication does NOT presuppose ________.
    A the process of sharing information, especially when this increases understanding between people or groups
    B the various methods of sending information between people and places, especially phones, computers
C a written or spoken message
D ways of moving between one place and another

Top 6 Universities in the World 2020

The Times Higher Education World University Rankings 2020, released on 11 September 2019, has revealed the world’s top universities.

11. The University of Oxford is one of the oldest and the most prestigious university in the UK and one of the best known in the world. There are more than 20,000 students at Oxford, with an almost equal number of undergraduates and postgraduates. About 95 per cent of Oxford graduates are either employed or in postgraduate study within six months of completing their studies. The university employs staff from just under 100 different countries and foreign citizens make up about 40 per cent of the student and academic body.

12. One of the most striking features of California Institute of Technology is its unusually small size; only around 1,000 undergraduates and 1,250 postgraduates are enrolled there. Caltech aims to foster an interdisciplinary environment in which students learn about and tackle the most challenging and fundamental scientific or technological problems. Among the unusual features of the university are the customary cookie break taken every Thursday by physicists and their students, and the university’s status as a distributor of olive oil.

13. The University of Cambridge operates a collegiate system, much like the University of Oxford. Almost all of the 18,000 students belong to a college or hall, where they have the option to live, study and sleep on site. There are 31 colleges and 150 academic departments at Cambridge. Every college has unique traditions and all students matriculate in a formal ceremony when arriving at the university. Many famous politicians, cultural figures and scientists spent time in Cambridge, including Isaac Newton and the founder of another of the most prestigious and well-known universities in the whole world.

14. Stanford University has generated many start-ups and entrepreneurs and was partly responsible for the development of the surrounding Silicon Valley. The large campus is home to 97 per cent of undergraduates and nearly 700 university buildings, alongside museums, gardens and recreational centres. There are just under 7,000 undergraduates and 9,000 graduates at the university, with a 7:1 student-to-staff ratio. Research at Stanford has a $1.22 billion budget and more than 5,000 of the projects are externally funded.

15. The Massachusetts Institute of Technology was founded mid-19th century and has always endeavoured to provide financial aid to students on a needs basis. The first female student, Ellen Swallow Richards, was admitted to the chemistry department in 1871. Just two years later, the first international student – from Canada – graduated from MIT. Admission to the university is extremely selective; only 8 per cent of applicants won a place in the graduating class of 2019. Graduates are employed by top companies, including Google, Amazon and Apple.

16. Princeton University is one of the world’s foremost research universities with connections to more than 40 Nobel laureates, 17 winners of the National Medal of Science and five recipients of the National Humanities Medal. Princeton has also educated two US presidents, James Madison and Woodrow Wilson, who was also the university’s president prior to entering the White House. Other distinguished graduates include Michelle Obama, actors Jimmy Stewart and Brooke Shields, Amazon founder Jeff Bezos and Apollo astronaut Pete Conrad.

What is the Difference between Scholarship and Grants?

People often wonder about the difference between scholarships and grants. Both are student financial aid that (17) __________ associated with higher education such as tuition, room, board, and textbooks. Though people sometimes confuse the terms or use them interchangeably, each has their (18) __________.

Scholarships are usually merit based. This means that they are given to prospective recipients based on desired qualities such as athletic ability, academic achievement or (19) __________. They require an application outlining why an applicant feels he or she is deserving of the award. Grants often take financial need into account in determining one’s merit for receiving funding aid. Both grants and scholarships usually have some sort of requirements in order to continue to receive funding, such as maintaining a certain Grade Point Average (GPA).

Scholarships are awarded by (20) __________. These can include businesses, religious groups, individuals, community organizations, college departments or alumni. Grants are different in that they usually come from state or federal financial aid that is given to the college or university itself.

As long as they have applied to or are enrolled in an accredited college, university or other institution of higher education, students can usually be eligible for both grants and scholarships. In order to receive federal or state grants, applicants (21) __________. Scholarships usually go to undergraduate students. Once the graduate level is reached, private financial aid comes in the form of what is known as fellowships. These fund advanced studies and research. Grants, however, can be awarded to those pursuing either undergraduate or graduate degrees.

As you can see, there are numerous differences in grants versus scholarships. One similarity (22) __________ is that they don’t need to be repaid, unlike college loans. There are a variety of scholarships and grants to be had, and most students are eligible for at least partial aid in some form.

Desperate to Go to School

Truancy has become a serious problem in many schools in recent years. In an attempt to tackle this problem one school introduced a new scheme to (23) __________ students to attend as many classes as possible. Pupils who (24) __________ a 100% attendance record throughout the whole academic year were (25) __________ with an all-inclusive weekend school trip to an activity centre where they would be able to have a go at (26) __________ activities such as climbing, abseiling and white water rafting.

One student was so (27) __________ to qualify for this free weekend away that he even went to school with a broken wrist. He hurt his wrist when he fell off his bike on the way to school but he was so worried about (28) __________ his 100% attendance that he didn’t (29) __________ his teachers or parents until the school day had finished. He (30) __________ admitted to his mother what had happened when she (31) __________ that he was having difficulty eating his dinner and asked him what was wrong. She took him to hospital that night, where they put his arm in plaster and he was able to go back to school the 5 next day.

Fortunately, he was fully (32) __________ from his accident in time to go on the trip.

A Career in Teaching

I first got into teaching 4 years ago when I decided to quit my office job and do a bit of travelling. I had heard of the CELTA qualification to teach English to adults and thought it (33) __________ a great way to see
the world. I (34) __________ in teaching since I was at school and with the CELTA thought it would be a perfect combination – teaching and travel.

Since completing the course, I (35) __________ time teaching in the UK, Austria, Poland and Spain and have loved every minute. I have taught people of all ages and levels. I would say the main thing I enjoy about teaching is the fact that you (36) __________ to engage with people from different countries, all of whom (37) __________ different backgrounds and experiences, and I feel that this therefore makes teaching an interesting, varied profession.

I (38) __________ the thing I found the most frustrating was probably going into different schools and trying to teach children and teenagers who were not interested in learning English and only there because their parents (39) ________ them. However, this meant there (40) __________ always a challenge in trying (41) ________ material that these students would be interested in and a job where you do not have challenges, I imagine would be rather boring.

I have recently started working as a primary school teacher, which I am really enjoying. I look back on my time (42) __________ abroad with a lot of fondness and for this reason it is something I would definitely like to do again in the future.

Task 1

Read the text below. Match choices (A – H) to (1–5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

All Jobs Are Important

Growing up in Kansas, I’d jump on my bike and disappear for the day. My friends and I built ramps and pretended we were Evel Knievel, the motorcycle daredevil who was big at the time.

1. __________

My father was a heating, ventilation and air-conditioning contractor. When I was 7 or 8, I started accompanying him to jobs at schools, offices and homes when school was out for the summer. By age 10, I was working with him. I was the perfect size to crawl under houses to install duct work. I’d run into raccoons, mice and other animals. I learned a lot about life from my father and from listening to the radio commentator Paul Harvey. At 13, I wanted to work in the local pizza parlour. I lied and told the owner I was 15 going on 16 so he’d hire me. In a small town, it’s hard to keep a lie like that going when your boss reads the paper and sees you in a photo of the baseball team for 13-year-olds.

2. __________

I planned to attend the University of Kansas at Lawrence to study journalism, so I joined the Army Reserves to help pay for it. Then I found out I got a scholarship. My time with the Reserves was a great experience, especially for a boy from southeastern Kansas who hadn’t seen much diversity. It taught me discipline, which people have said is evident in the way I structure my day. I also learned that it’s important to accomplish a mission – and to accomplish a team goal while meeting individual members’ needs.

3. __________

In college, I started a business with my roommate, making fliers for companies and posting them on campus. We’d get up at 5 a.m. and cover the bulletin boards in dorms and other buildings.

I was making good money, but owning a company means you can spend a lot of time collecting money owed to you. I didn’t want to do that when I graduated. I took a job with a client who owned theme parks and then moved to Six Flags, where I worked from 1992 to 2006; I was president of three locations, in Illinois, Massachusetts and New Jersey.

4. __________

I decided to try something else, so for the next 18 months I worked for a company that was building the Burj Dubai (now the Burj Khalifa) skyscraper and the Dubai Mall. I was based in Chicago but travelled to Dubai a few times. Many people were there for financial reasons. In the development projects, I would see the construction workers, mostly from Asia, sleeping on the ground on their breaks. I was amazed at how little they were paid – under $10 a day – and at how hard they worked. We take so much for granted in this country.

5. __________

Americans often think their nation is the centre of the business world, but that is changing. No one in Dubai referred to Wall Street or many of the other things we view as important. The Middle East and other areas have an energy and a gravity that many Americans aren’t aware of.

When I was offered my current position, I liked the idea of going from a publicly held company concerned with quarterly earnings to a private one with longer-term plans. This is a family-owned business, and the members understand that the Space Needle is a cultural icon and a landmark that will be here for years. We’re making plans for the 50th anniversary of the Space Needle, built for the 1962 World’s Fair. My job is also to help this attraction stay current and prepare for the future.
My three children, all under 10, think that my C.E.O. title means that I’m chief elevator operator at the Space Needle. My wife doesn’t dissuade them of that belief, and they’re not shy about telling the neighbours. In this organization, no job is more important than any other, so if they view chief elevator operator as one of the most important jobs, I would have to agree with that.

A. Eye-opening experience at the construction site
B. Gaining knowledge about life
C. Advantages and disadvantages of the first business
D. Never lie to your boss
E. Shifts in the business world
F. Diversity of Kansas
G. Important skills acquisition
H. Cultural icons and landmarks are protected by law

Task 2

Read the text below. For questions (6–10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

A Career in the Video Games Industry?

Initially populated by computer scientists and the self-taught, the video game design industry used not to offer many routes into its midst. Often, perhaps unfairly, viewed as just a hobby for young enthusiasts, the video games industry is now being taken seriously. Surprised? Industry experts aren’t.

It’s not easy though. Video game spin-offs that rapidly follow any new movie require dozens of team members and months of incredible skill, perseverance and intricacies. As with almost every industry, it’s tricky to get into — but it is expanding. Jim Donelly, a spokesman for an online games magazine says: ‘It’s certainly very difficult to make much headway within big companies, or to influence any of the really big mainstream games. But the truth is, the industry needs game designers more than ever. Not just director-level people who orchestrate an entire game, but the lower-level people who design systems and individual set pieces.’

So, how can you get into such a competitive industry? Although many companies prefer people to have a degree in computer science, Jim disagrees. There is only one route: make games. The tools are there. You won’t get a job if you haven’t made something, and you won’t get anywhere independently if you are not making stuff. Game design is less a job than it is a way of life. Like any creative endeavour it must be done to be real. Another industry expert, John Field, sees other options. ‘There’s a lot to be said for “just doing it”, but it’s really more complicated than that. There are lots of people who want to work in games, but few who measure up to the requirements of the industry these days; even fewer who have the creative talent, technical know-how, vision and entrepreneurial ability to really contribute to the ever-changing face of an evolving medium.’

Can you do it on your own? ‘Perhaps, but it’s pretty tricky,’ says John. ‘However, a good postgraduate course in games can help, plus provide a year or two of top-level support and guidance. Most games designers start their careers as programmers, or artists, progressing their way up the ladder. They are interested in all forms of entertainment media, plus have a healthy appetite for all areas of the arts and contemporary culture. They may or may not have spent a few years in the working world post-graduation, but have realised that games is going to be their “thing”. They are not merely fans, but are fascinated by the future possibilities of games, and are aware of the increasing breadth and diversity of the form. And finally, connections can help. This is often overlooked, but in order to get line ahead in games – as in many other areas – you need to network.’
6. What is the writer’s main point about the video games industry in the first paragraph?
   A It is reasonable to consider making a living in this field.
   B Young people’s contributions to it should be appreciated.
   C It offers a relatively limited number of career options.
   D Specialists in this area have failed to value its potential.

7. What does Jim tell us about the video games industry?
   A It can be hard to decide which idea will prove successful.
   B Many designers are required to take charge of each large project.
   C It is worth recognising the value of having a long-term strategy.
   D There is room for people with different degrees of responsibility.

8. What does ‘that’ typed in bold refer to?
   A getting a degree in computer science
   B making games
   C being independent
   D seeing other options

9. What opinion does John express in the third paragraph?
   A It is a mistake to believe that the jobs people do in the industry are easy.
   B Many people lack the qualities needed to do effective work in the industry.
   C The industry could benefit from people who have a strong desire to work in it.
   D The industry is changing too rapidly for people to keep up with it.

10. What does ‘overlooked’ typed in bold mean?
    A not considered
    B understood
    C not used
    D required

Task 3

Read the texts below. Match choices (A – H) to (11–16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

Volunteers

11. John
    This was the first volunteering project I worked on overseas and Green life volunteers proved to be a good choice. I decided for the Bird Conservation project, which is run by Osa Birds: Research and Conservation. Most of the time I did basic maintenance jobs and fed the birds. ‘They can break coconuts with their beaks and they’ll take your finger off so be careful,’ our boss advised. So, I chopped bananas and then used a long fork to pass the fruit in to the birds without risking my fingers.

12. Teresa
    For many years I had fantasised about spending December on a white, tropical beach on a remote island. I finally found my slice of paradise in the Seychelles when my dream came true last year, though not exactly in the way I had envisaged. I had been feeling burnt out from work and wanted to escape winter and learn new skills. Volunteer projects seemed a good option. Narrowing my search criteria to marine research helped cut
down the thousands of options out there and I eventually joined a coral protection project to help determine the long-term impact of rising sea temperatures on the ecosystem.

13. Patricia

Imagine spending the summer as I did, working on the edge of the active volcano in Hawaii. I had once been on a ranger-guided walk there with my family. I had been terrified. However, as I relaxed, I slowly realised that the ranger’s job was something I’d like to do too. So, a few years later I applied and got a volunteer ranger job. I found living there surprisingly laid back, as well as exciting. After a crash course in geology, I was given the volunteer ranger uniform and began the job. On the first morning I found myself in front of a group of visitors. Suddenly I was the ‘authority’, delivering a talk on the volcanic past and present of the islands. As a volunteer I was making the park come alive for the visitors, and they in return made Hawaii come alive for me.

14. Helen

After a month of study, I wanted to get away for a bit. My dad is an artist and often does paintings of tropical birds. I’d always wanted to find out more about them. From the Internet I found that a farm which breeds parrots was looking for volunteers. I arrived in the middle of a panic situation – a storm had knocked the electricity out, and the generator, needed for keeping the eggs warm, was nearly out of petrol. After visiting several garages, we found some and dashed back just in time. I really enjoyed my stay. Some hosts lay down strict rules on the amount of work expected but luckily mine, Darryl, preferred to set out projects which he wanted my help with.

15. Kate

During my stay in Guatemala, I volunteered to work on a plantation. One day, my supervisor, René inspected my scratched hands and asked gently if I needed gloves. I gathered my strength and told him that gloves might indeed help. Then I grasped my knife and resumed my attack on the invading roots that were constantly threatening to drag the fragile new cacao plantation back into the rainforest. In the sticky red earth, everything grows – the trouble is that it is rarely what you planted. Walking through the plantation, René had to point out to me the treasured cash crops of coffee, cacao and macadamias. To my eye, they were indistinguishable from the surrounding jungle.

16. Anne

Volunteering for a coral reef conservation project was the perfect way for me as an ocean lover and passionate scuba diver to help and protect our surroundings. Within 24 hours of our group’s arrival, we lived and breathed coral, not just under water but also in the camp – with 52 coral types to master and up to three research dives a day. If there was a downside, it was the seemingly endless chores in the camp, but I didn’t mind. But the experience was, overall, incredible. I couldn’t even imagine it in my wildest imagination.

Which volunteer _____?

A found that there was a wide choice of opportunities
B was warned of a possible danger
C says her family had influenced her choice of work
D was not aware of all aspects of natural life around her
E thought that she had gained as much as she had given
F had only one disadvantage which was not important
G appreciated the broad-mindedness of her boss
H was shown sympathy by someone on her project

Task 4

Read the text below. Choose from (A – H) the one which best fits each space (17–22). There are two choices you do not need to use. Write your answers on the separate answer sheet.

I was 12 years old when I first saw a show in my local leisure centre. I was fascinated by the fact that everything came in about ten lorries and they basically built a theatre from scratch. I was very curious as I (17) ______ and I found it hugely exciting.

The more I found out about technical theatre (18) ______. However, what I really wanted was to get involved and start working as part of a stage management team.

I left school when I was 16 and because I had quite a lot of experience I was able to get a job as an assistant stage manager in a theatre in London. I worked there for about a year and then did some freelance work in Cornwall and went on tours around the country. The work was quite sporadic but the money was good; (19) ______. Working on tour was intense but really good fun. A typical Monday would see us arrive at about 8 o’clock in the morning and open up the lorries. While the cast were getting ready (20) ______.

After a couple of years touring I decided to return to London and go to college to study technical theatre. I studied for a year but I realised that it wasn’t very useful to me. I had learnt a lot more from my years working. It was a course for people (21) ______. Theatres are looking for people with proven ability and who know what they are doing. I did some more freelance work in London for a while and now I work for a production company.

I really like what I do. There are of course a number of disadvantages; I don’t like the hours and the disruption to my personal life that working evenings can cause. Also (22) ______ and the money is not always good. But I would highly recommend it to others.

A who didn’t know anything about the theatre  
B the more interested I became  
C there’s quite a lot of instability and insecurity to the job  
D we would get on with any necessary maintenance jobs  
E watched the whole thing being put together  
F because there are so many more people to organise  
G in one month I could earn enough to last me six months  
H what interests them the most on your CV is your last job

Module 5
Food. Culture
(Art & Music)
Task 1

Read the text below. Match choices (A – H) to (1–5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

Pablo Picasso

Pablo Picasso was one of the greatest artists of the 20th century. He experimented in many different styles and changed the world of art during his time. Pablo Picasso was born in Malaga, Spain in 1881. His father was a drawing teacher. At 10 Pablo became his father’s pupil and at the age of 13 he held his first exhibition. His family moved to Barcelona in 1895 where Pablo joined an art academy. In his early period the young artist painted life as he observed it around him – in cafes and on the streets. At the turn of the century, Picasso went to Paris, which was, at that time, the centre of art and literature.

1. __________

In 1901 a close friend of Picasso shot himself. This had a great impact on Pablo. He was very sad and began painting his pictures in grey and blue tones instead of bright, vivid colours. Later on, he changed his painting style and started using more earth colours – rose, pink or brown. He liked to paint pictures of circus life with dancers and acrobats. This period lasted until 1907.

2. __________

When Picasso started working with his friend and fellow painter Georges Braque in Paris they started experimenting with a new style. Picasso and Braque didn’t want to show nature as it really was. They thought that all objects in nature had geometric forms. In cubism, objects were cut into many flat shapes, which looked like a puzzle. All the sides of a person’s face, for example, were shown at once, maybe even with three eyes instead of two. Cubist painters wanted to show all parts of an object from one angle.

3. __________

In 1917 Picasso went to Rome to design costumes and scenery for a Russian ballet company. During this period he fell back to classical forms and painting techniques but never gave up experimenting with cubism. This new style was influenced by Greek and Roman art. The trend was characteristic of weighty and serene figures, donning robes in tactile, yet simple landscapes. This trend in art would go on to dominate the stage in Europe for over a decade. Picasso emerged as a leading figure in this new art direction.

4. __________

In 1936 Civil War broke out in Spain. During this period he painted his masterpiece Guernica. It shows the terrified people of the ancient Spanish town which was bombed during the Civil War. Picasso was shocked by this inhuman act and in his painting he shows people running in the streets and screaming with their mouths wide open. To display his sadness and anger he used only black and white as well as shades of grey.

5. __________

After the war Picasso moved to a big house in the southern part of France. There, he continued experimenting with paintings and sculptures. He continued his work up to his death in 1973. Picasso was known as a very moody person and he also displayed this in his paintings. Sometimes he was thoughtful, even sad, and at other times he could be very humorous. Picasso was never satisfied with his own work and he never stopped experimenting.

Where Did Music Come From?

What is music? Musical expression can be divided into two groups: vocal music or «song» which consists of complex, learned vocalizations and instrumental music which consists of structured, communicative sound using parts of the body other than the voice and sometimes additional objects.

Although the production of music is considered uniquely human, musical utterances of various degrees of complexity and perfection can be observed in several species in the animal kingdom. Vocalizations of amazingly high complexity and musicality have evolved several times in birds and mammals. Most research has been done on songbirds so far, but also parrots, hummingbirds, whales, seals and possibly other species show vocalizations that can be called musical according to the above definition. Birdsong is commonly regarded as the most complex vocal utterance in the animal kingdom. Some species, such as blackbirds, nightingales and white-rumped shamas, deliver vocal performances of outstanding musical quality that come close to human music in many aspects. Traits of the latter such as an extensive repertoire of melodies, a sense of diatonic intervals, very precise pitch recognition and intonation, ability of transposition, melodic and dynamic variation, imitation, improvisation and composition have been observed in songbirds in various degrees of perfection.

Instrumental sound generation is very rare among animals. Simple sounds that are instinctive and serve functions like signalling danger are usually not regarded as music. Our closest cousins, the African great apes (chimpanzees, bonobos and gorillas), make drumming sounds with their hands – sometimes with both arms – on their own chest, the ground, on objects like tree roots and even on other individuals. Chimpanzees have been found readily adapting other surfaces to drumming including hollow walls. Drumming sequences typically last only a short time, between one and twelve seconds. It is currently unknown whether apes can learn rhythms. It is also unknown whether they can create more complex rhythmic patterns than the simple, steady beat typically observed. There are a few other drumming species, including palm cockatoos, woodpeckers and kangaroo rats. However, using both hands to drum seems to be unique to the great apes and humans.

But why did music develop? This natural question may be asked in another way: what, if any, adaptive functions does music serve? In other words, what advantage did species with musical skills have that allowed them to have more offspring than those that did not? This is a question that interested Darwin. In fact, he was probably the first to ask it, when he said «As neither the enjoyment nor the capacity for producing musical notes are faculties of the least use to man in reference to his daily habits of life, they must be ranked amongst the most mysterious with which he is endowed».

Few stones have been left unturned as to potential functions of music since Darwin posed the question. Many researchers have many different ideas. The following hypotheses about the function of music are among the most common that have been suggested so far. As a null hypothesis, it has been proposed that music has no adaptive function at all. Perhaps it is a mere byproduct of some other ability that we need, such as language. Another often talked about purpose for music, prominent both in the scientific literature and in the popular press, is in mate choice. Data on birdsong and whale song support this hypothesis. Other ideas include that music might have begun with the use of song by mothers to soothe infants, or as a learning tool in the play of young animals.

6. What is special about music?
   A It can be played with musical instruments.
   B It also involves additional objects.
   C There can be vocal and instrumental subdivision.
   D It always includes communicative sounds.

7. Why are birds’ sounds considered to be the most difficult in fauna?
   A Their melodies are varied and resemble human music.
   B Their musical utterances contain vocalization.
   C Intonation of songbirds is easily transformed.
   D There are paused diatonic intervals in all of them.

8. What was NOT mentioned in the text?
   A What features are peculiar to songbirds.
   B How long the scientists have studied the animal kingdom.
   C What species the researches have been devoted to.
   D Animals can sound like a drum.

9. How can apes drumming be described?
   A It is all about improvisation and imitation.
   B It can be recognized easily.
   C As very noisy.
   D As balanced and plain.

10. What are the functions of music?
    A They are unknown and mysterious.
    B Music is used for protection.
    C Adaptive function is the most important.
    D Scientific theories suggest different explanations.

Task 3

Read the texts below. Match choices (A – H) to (11-16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

11. The National Gallery
    The National Gallery is an art museum in Trafalgar Square in the City of Westminster, in Central London. Founded in 1824, it houses a collection of over 2,300 paintings dating from the mid-13th century to 1900. The Gallery is a charitable and a non-departmental public body of the Department for Digital, Culture, Media and Sport. Its collection belongs to the government on behalf of the British public, and entry to the main collection is free of charge. It is among the most visited art museums in the world, after the Louvre, the British Museum, and the Metropolitan Museum of Art.

12. Derby Museums
    The Museum and Art Gallery boasts paintings and artefacts that are of both local and international importance. People can visit a collection of Joseph Wright paintings. Visitors can explore historic artefacts from thousands of years ago, within our Archaeology Gallery. The collections are regularly updated, so there will always be something new – no two visits will ever be the same! There is also a newly refurbished shop of unique souvenirs and art materials to browse at your own leisure.
13. Bristol Museum & Art Gallery
Bristol Museum & Art Gallery is a large museum and art gallery in Bristol, England. As part of Bristol Culture it is run by the Bristol City Council with no entrance fee. It holds designated museum status, granted by the national government to protect outstanding museums. The collections include: geology, Eastern art, and Bristol's history, including English delftware. In January 2012 it became one of sixteen Arts Council England Major Partner Museums. The art gallery contains works from all periods, including many by internationally famous artists, as well a collection of modern paintings of Bristol.

14. The Kelvingrove Art Gallery & Museum
It is a museum and art gallery in Glasgow, Scotland. The museum has 22 galleries, housing a range of exhibits, including Renaissance art, taxidermy, and artifacts from ancient Egypt. The centrepiece of the Centre Hall is a concert pipe organ constructed and installed by Lewis & Co. Its music is beautiful. There is an urban myth in Glasgow that the building was accidentally built back-to-front, and the architect jumped from one of the towers in despair upon realizing his mistake. In reality, the grand entrance was always intended to face into Kelvingrove Park.

15. The Rugby Art Gallery & Museum
It is a combined art gallery, museum and library located in central Rugby, Warwickshire, in England. The purpose-built building housing it was opened in 2000 and was built in the place of Rugby's previous library. The art gallery hosts a nationally recognized temporary. The museum hosts a collection of Roman artefacts, excavated from the nearby Roman town of Tripontium. It also has a display of the social and industrial history of Rugby. It also houses the town's visitor centre.

16. Manchester Art Gallery
Formerly Manchester City Art Gallery, it is a publicly owned art museum. The main gallery was built for a learned society in 1823 and today its collection occupies three connected buildings. Both Barry’s buildings are listed. Manchester Art Gallery is free to enter and open seven days a week. It houses many works of local and international significance and has a collection of more than 25,000 objects. More than half a million people visited the museum in the period of a year, according to figures released in April 2014.

An American musician, Joel Cohen, who was working for a French radio station, (18) ___________ with the idea for a music festival that everyone could enjoy and take part in. He suggested an all-night music festival (19) ___________. The French minister for culture liked
the idea and it first became reality in June 1982. The main idea is that music is a great way
to bring people together regardless of their nationality, ethnic and cultural background or age. It was extremely
popular.

Today the event is celebrated in cities so far apart as Potsdam and Osaka, New York and Sydney. The
day does not only involve individual musicians but also orchestras, cultural organizations, and schools. The
best thing about the festival is that outside the usual music venues and concert halls. Whole
towns are turned into huge outdoor concerts. And every kind of music is on offer. You can hear classical music,
jazz bands, rock groups, pop bands, folk music and singer-songwriters all in the same place, and all for free.

Task 5

Read the text below. For questions (23–32) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Smoothies

Smoothies are cold drinks made from fruit and vegetables to which crushed ice, milk, honey or yoghurt is also often added. This gives them a thicker milkshake-like consistency. They have long been a popular alternative to drinks and are marketed as a healthy option. For many years now they have been widely available in high street coffee shops and supermarkets. They are packed with fruit and vegetables, but are smoothies really good for us?

One popular brand advertised that their drinks two of the suggested five of fresh fruit or vegetables which we should every day. This claim resulted in an investigation into just how healthy these drinks really are. The results were good news for all smoothie lovers. The research found that the brand’s 250ml non-dairy drinks did in fact contain pulped fruit and fruit juice to count for two of the recommended daily portions of fruit and vegetables. As health officials have agreed that smoothies are good for us. However, not all smoothies are the same. There is a great diversity of and consumers are advised to check the contents carefully. Some may contain as much as a quarter of your recommended daily allowance of saturated fat and up to 40 g of sugar. In conclusion, it seems that although smoothies are a good of the vitamins and minerals found in fruit and vegetables there are also a lot of unhealthy variations.

Task 1
Read the text below. Match choices (A – H) to (1–5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

Clothes

1. __________

Clothing is a distinctly human artifact. Even more than the use of tools, it distinguishes humans from the other creatures on this planet. While there are other creatures which use implements to a greater or lesser degree, clothing is unique to humanity. Clothing is also uniquely human, in that it serves more than one function. The basic purpose of clothing was originally utilitarian. By putting on an artificial skin, humans were able to move into regions where they otherwise would have been unable to cope with the climate.

2. __________

Clothing tells us many things about the wearer. It can be used to indicate whether she is a member of a particular group or organization, the most extreme example of this type of clothing being a uniform. It tells us a lot about the importance of clothing that the clothes a person was wearing have been, literally, the difference between life and death. In war, soldiers recognize friends and enemies by their uniforms. Spies may be shot if captured, but if they go about their business in the uniform of their country, they are regarded as legitimate members of that country’s armed forces.

3. __________

Uniforms can also be less formal. Anyone who has seen a group of teenagers walking together will have noticed that their clothing conforms to the standard set by their particular group. Nor are teens the only ones who are subject to such pressures. It is a rare businessman who does not feel the need to wear a suit and tie. Most politicians also try to be neat and well-dressed. People who wish to impress others often do so by the selection of their clothes – sometimes by choosing more expensive versions. This can be seen particularly in the fashion industry, where clothing by a particular designer fetches prices which are out of all proportion to the actual utilitarian value of the material.

4. __________

The significance of what we wear and how we wear it is, if anything, becoming more rather than less important as the cultures of the world mix and sometimes come into collision. There have been cases on holiday islands where the locals have a strict conservative tradition and have been outraged by visitors – especially female visitors – who wear far less than the minimum that the locals consider decent. The humble headscarf has become a symbol of conformism to religious values, and some westerners are as affronted by a woman wearing one as others in the Middle East are upset by its absence. (Yet in medieval Europe, both men and women habitually kept their heads covered in public, and almost always when outdoors.) Indeed, the signals given by clothing as worn by men and women have not decreased because many women now wear what were once “men’s” garments. For example, today most women are very comfortable wearing jeans. Yet the sight of a man in a dress would raise eyebrows in most western cultures. For even though the signals given by clothing change over time – the ancient Romans thought that only barbarians wore trousers – the signals themselves are as strong as ever. It is impossible not to signal something about yourself in the clothes you wear, for even not trying to say anything is itself a strong signal.

5. __________

Therefore, even though we are steadily managing to adjust our micro-environments to temperatures which are as close to ideal as the human body wants, and even though sexual taboos of undress are being steadily eroded, it is highly unlikely there will be no use for clothing in our future, unless humanity evolves into a completely new species.

(Adapted from: https://www.english-online.org.uk/fcefolder/fcereadp2.htm)
A Clothes show the membership of a group.
B Clothing is a feature of humans.
C Different types of a uniform are a form of pressure.
D People will wear clothes in future.
E According to the article, uniforms are mainly worn by soldiers.
F Uniforms are always worn by teenagers.
G In future clothing will be worn by other species.
H Signals given by clothing are changing nowadays.

Task 2

Read the text below. For questions (6–10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

The Fake Hairdresser Remembers

Some years ago, a British TV company came up with an idea for a reality TV show. People with no experience would be trained in a profession in a very short period of time, then would try and pass themselves off as the real thing with the general public. The show was called Faking It, and the format has since been imitated the world over. One of the first contestants was Gavin Freeborn, a twenty-three-year-old farmer’s son, who trained with celebrity hairdresser Trevor Sorbie in London. Gavin remembers the experience.

'I was at university, studying for a degree in agriculture, when some friends mentioned that a TV company had advertised for people to take part in Faking It. They were looking for someone who’d never picked up pair of scissors or thought of hairdressing as a career, which I certainly hadn’t. I reckoned it would be a laugh. Having spent my school holidays shearing sheep on my parents’ farm, I was used to the idea of haircutting, but obviously it’s harder doing it on people – because they have an opinion about it!'

'I’d never been to London before and it was so busy that I felt a bit overwhelmed at first. Meeting Trevor for the first time, he seemed really strict, but once he realised I was taking the challenge seriously we got on like a house on fire and they often had to stop filming because we couldn’t stop giggling. Fortunately, I didn’t have to do any of the washing or sweeping floors other people new to the business have to do. I went straight into blow-drying and cutting instead.'

'At first I practiced on a dummy’s head, which was a welcome safety net, but I did make a really bad mistake halfway through filming when I was cutting one real man’s hair. I’d been shown how to use clippers to get a cropped effect but hadn’t been warned to angle the comb. I ended up shaving off a huge patch of hair! He couldn’t see what I’d done, but the camera crew couldn’t stop laughing, so it was obvious I’d made a mistake. Luckily, I managed to rectify the situation and told the client, who was alright about it, so I forgave them.'

'By the day of my final test, I knew I was capable but I felt sick with nerves. I didn’t want to let Trevor down. But even though I failed to convince the client that I was a real hairdresser, she approved of the haircut and the judges were impressed by it, too. It didn’t worry me at the time but, looking back now, I think it was a bit unfair that I was penalized for taking too long – an hour-and-a-half – when I’d been taught the most important thing was to ensure your client walks out of the salon feeling like a million dollars.'

'After the programme, I went home for a week but I decided to come back to London because I’d fallen in love with the buzz of the city. People in town kept stopping and staring at me as if I was famous. I found this unnerving at first, but with time I got used to it. There were a few comments about me being too full of myself, but I took no notice.'

'When I agreed to do Faking It, I had no idea how much I was signing my life away, but I couldn’t say I have any regrets. The thing is that I’ve discovered growing up on a farm doesn’t mean I can’t work in a creative field. What’s more, I’ve now got choices I didn’t realise I had, which is brilliant. Although I still keep in contact with everyone from Trevor’s salon, and we all go out when I’m in London, I’m hardly a celebrity anymore.'

6. Why did Gavin first apply to be on the programme?
   A He liked the idea of going to London.
   B He thought it would be fun.
   C His friends managed to talk him into it.
   D He had some experience of hairdressing.

7. How did Gavin feel about the hairdressing mistake he made?
   A sorry that the client was dissatisfied
   B relieved that the client didn't notice it
   C annoyed by the reaction of the camera crew
   D pleased that he was able to find a solution

8. Thinking about the final test now, Gavin feels that he_____
   A was unjustly criticised for one aspect of his performance
   B didn't take enough notice of his client’s wishes
   C was too slow in completing the haircut
   D should have paid more attention to things he’d been taught

9. What does the italicized word ‘it’ refer to?
   A people making comments about Gavin
   B Gavin feeling proud of himself
   C people looking at Gavin in the street
   D Gavin feeling uncomfortable

10. Looking back on the whole experience, Gavin now ____
    A realises that his life has given more opportunities as a result
    B wishes he’d thought more carefully before applying
    C appreciates his farm upbringing more
    D accepts that it has helped him to become a celebrity

Task 3
Read the texts below. Match choices (A – H) to (11–16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

**Ethical Fashion Doesn’t Have to Be Expensive & Exclusive**
We’re sharing brands that make ethical shopping an affordable experience.

11. Outdoor Voices
   Ethics | Uses recycled materials, ethical production
   Product Range | Adult activewear
   Price Range | $25 – $80

   Outdoor Voices creates high-quality activewear that encourages wearers to get outside and be active. The brand is always on the lookout for better, more sustainable technical fabrics, like the recycled polyester and sustainably-produced Merino wool. From the adult activewear separates to the affordable outfit kits, these durable and ethical athletic essentials will have you #DoingThings in no time.

12. ABLE
   Ethics | Artisan-made in Peru, fair labor practices
   Product Range | Women’s apparel, denim, shoes, bags, jewelry
   Price Range | $25 – $80
ABLE believes that to end generational poverty, you must create economic opportunities so people, specifically women, can provide for themselves. The brand’s beautiful bags are made all over the world by fairly-paid women who’ve overcome extraordinary circumstances.

13. TENTREE
*The Good Trade Partner*
Ethics | Ethically-made, organic, eco-friendly, gives back to the environment
Product Range | Adult apparel, hats, backpacks, and accessories
Price Range | $25 – $80

TENTREE is rooted in the belief that we have a responsibility to protect and preserve the world we live in. This earth-first apparel brand celebrates its commitment to our planet with ethically-crafted and sustainably-designed products, all the while planting ten trees for each item purchased. With a motto of “Buy one, plant ten,” TENTREE believes that you don’t have to be a hardcore environmentalist to make a difference. The brand has now planted over 35 million trees around the world, and is well on the way to planting one billion trees by 2030.

14. Thought Clothing
Ethics | Organic, eco-friendly, sustainable
Product Range | Adult apparel, socks, accessories
Price Range | £25 – £300

Thought makes eco-friendly clothing from organic ingredients, including cotton, bamboo, and hemp. Boasting a wardrobe of unique colors and gorgeous styles, the UK brand offers affordable pieces that are perfect for work, a night out, or even lounging (don’t miss the cozy nightwear). Don’t worry if you’re not a UK resident; Thought ships worldwide!

15. People Tree
Ethics | Fair trade, certified organic
Product Range | Women’s tops & bottoms, dresses, skirts, accessories, gifts
Price Range | $80 – $500

It would be remiss of us not to include the fair trade pioneers, People Tree. Also based in the UK, this brand creates beautiful garments that last – items we bought years ago still look stunning as the day we purchased them. All clothing from People Tree is fair trade and made with eco-friendly, organic fabrics.

16. Kotn
Ethics | organic, safe & fair labor standards, gives back
Product Range | Adult cotton basics
Price Range | $25 – $300

Kotn is known for clothes made of soft and remarkably breathable Egyptian cotton. Working directly with farmers, the brand pays fair prices for cotton and assists suppliers in making the switch to organic. With affordable basics (we love the classic white tees and nostalgic 90s sweatshirts), Kotn is crafted with quality and comfort in mind. So long, consumable t-shirts.

Ethical fashion

The fashion industry has been slow and unwilling to change the way it works; we’ve known for ten years now that (17) ____________, exposes workers to dangerous chemicals and often does not respect workers’ basic rights. However, Estethica is beginning to improve the situation and change (18) ____________. Estethica was launched at London Fashion Week six years ago and is now an important part of the show. It is a place where ethical designers and fashion houses (19) ____________ and the results are promising. It is not just about the exclusive end of the fashion market, well-known high street brands are also gradually increasing (20) ____________. To be part of Estethica the rules are clear and strict. Firstly, farmers and workers must be paid a fair amount of money, (21) ____________ common projects such as schools and hospitals. No child labour is used in the process of making the clothes. All the materials used in the production of fabrics should be organic, that is produced without the use of artificial chemicals. This is better for the local environment but also safer for workers. An effort is also made (22) ____________; transportation is kept to a minimum for example. Fabrics are used and waste is recycled where possible. And finally working conditions and production methods are valued higher than cheap clothes.

(Adapted from: FCE Practice Tests Karen Dyer Dave Harwood. 2015.p.183)

A to reduce the environmental impact of the whole process
B their ranges of ethically produced clothing
C the fashion industry uses child labour
D have the chance to show their designs to the world of fashion
E and profits from the business are often spent on
F the face of fashion
G the fashion is changing for the better
H child labour is not used any more

Task 5

Read the text below. For questions (23–32) choose the correct answer (А, В, С or D). Write your answers on the separate answer sheet.

Shopping Malls

Victor Gruen, an American architect, revolutionized shopping in the 1950s by creating the type of shopping centre that we now call a shopping mall. Gruen’s (23) ____________ was to provide a pleasant shopping environment in the suburbs. This meant shutting out the noise of the city environment and also enabling people to shop in all kinds of weather. He (24) ____________ on using building designs that he knew people would feel (25) ____________ with, but placed them in landscaped ‘streets’ that were entirely enclosed and often covered with a curved glass roof. This was done to imitate some of the older shopping arcades of city centres, but while these housed only small speciality shops, Gruen’s shopping malls were on a much grander scale.
Access to the whole shopping mall was gained by using the main doors, which (26) disconnected the shopping ‘streets’ from the parking areas outside. As there was no need to (27) withdraw out bad weather, shops no longer needed windows and doors, and people could wander freely from shop to shop. The space required to build a shopping mall and visit its vast car parks can usually only be found in the suburbs or on the edge of the city. 

23 A search  B aim  C direction  d view
24 A demanded  B requested  C emphasized  d insisted
25 A favourable  B agreeable  C comfortable  d enviable
26 A disconnected  B separated  C withdrew  d parted
27 A keep  B Stay  C run  d hold

Markets

In practically any country in the world, you are sure to find a market somewhere. Markets have been with us since (28) ancient times, when people became self-sufficient and needed to exchange the goods they produced. For example, a farmer might have exchanged a cow (29) for tools and so on. But just as times have changed, so have market practices. So, whereas in early times the main activity (30) associated with markets would have been ‘bartering’, meaning the exchange of goods as described above, today most stall-holders wouldn’t be too keen on accepting potatoes as payment, for instance, instead of cash.

In contrast, what might be a common sight in a modem market is a certain amount of ‘haggling’, where customer and seller eventually (31) connected on a price, after what can sometimes be quite a heated debate. This has become so popular in certain places that many people think that this is what makes the unique atmosphere of a market. But just as no two people are the same, no two markets are the same either, and so behaviour which is expected in one market in one country may not be (32) acceptable in another. Even within one country, there are those markets where you could bargain quite easily and those where you would be advised not to try!

28 A antique  B ancient  C old  D past
29 A into  B by  C for  D over
30 A associated  B attached  C connecting  D relating
31 A connect  B agree  C discuss  D speak
32 A suitable  B convenient  C acceptable  D comfortable

Task 6

Read the text below. For questions (33−42) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

The Oldest Leather Shoe in the World

Archaeologists report that a perfectly preserved (33) antique shoe has been discovered in a cave in Armenia in south-west Asia. It is believed to be the oldest leather shoe ever found. The shoe was made of a single piece of leather, stitched at the front and back, and was shaped to fit the (34) small foot. It had been stuffed (35) by grasses, either for warmth or to make sure it kept its shape. ‘The shoe is relatively small but we can’t say for certain (36) whether it was worn by a man or a woman,’ says Dr Ron Pinhasi, an archaeologist on the research team. ‘We thought at first that it was about 600−700 years old because it was in
such good shape. Shoes of this type from later periods have turned up in archaeological excavations in various places in Europe, and shoes of a very similar design were still being used on the Aran Islands off the west coast of Ireland as recently as the 1950s. It’s obviously a style which remained popular (37) ________ thousands of years.

Module 7
Travelling & Tourism
Types of Tourism

1. __________

This kind of tourism is also referred to as grief tourism that involves visiting those places and sites, which have been witnesses to some of the major tragedies in history. Apart from their tragic histories of human suffering and bloodshed, most of these locations are also popular for their historical value. The curious human mind is often more attracted to places that are associated with things far from normal, and hence, sites bearing violent pasts have become popular tourist destinations, receiving a large inflow of visitors year after year.

2. __________

If you’re a European citizen over 25 then there’s a good chance you remember this term, which in reality was politically motivated. The phrase “benefit tourism” was invented in the 1990s. It was later used for the perceived threat that a huge number of citizens from the new, poorer nations who were given membership in the EU would move to the richer states such as France or Sweden to benefit from their social welfare systems rather than work.

3. __________

Tolkien tourism has become a growing trend thanks to the huge success of the “Lord of the Rings” books and films. It has expanded and diversified to such an extent that now it offers enough places to visit so that even the most detailed curiosity of the most demanding Tolkien fan is sure to be satisfied. That makes New Zealand the best hotspot because it’s the main location where the films were shot.

4. __________

The name “shark tourism” says it all, and you probably can’t get a scarier or more dangerous type of tourism than this. Shark tourism is actually a subgenre of another type of tourism – ecotourism. It attracts all these people who love sharks and their bloody jaws. Anything related to the Great White shark (and other) is what’s on offer. Experienced divers and protective cages are must-haves for this adventurous kind of tourism.

5. __________

A fascination with ghosts drives some people to travel in search of the paranormal. Behind many famous landmarks is a great ghost story and indeed, popular tours in places like Dublin, Florida, Quebec City and Brisbane explore historic, “haunted” city quarters. Locations of “ghost tourism” include proverbial ghost towns across America, Canada and Australia as well as notorious places like Jonestown, Guyana, and parts of Transylvania.

A  Supernatural tourism
B  Difficult choice
C  Immigration tourism
D  For true sports fans
E  Dark tourism
F  For those keen on science
G  Appealing to all fans
H  For brave ones only

**Space Tourism of the Future**

It is not a secret that millions of people have a dream to experience space travel. There are many different reasons what attract them in the outer space. It is found that “since the early days of science fiction in the 1930s, the image of space flight as adventurous and exciting has played a growing role in popular culture”. Besides, those people who have already visited space state that it provides a highly enjoyable life experience. It is so pleasant to have the view of the Earth and stars and have the fascinating experience of living in the so called zero gravity. That is why space tourism will be one of the highly-valued industries in the nearest future. Some experts have already determined the commercial potential of the future space travel.

It is possible that future space travel would be performed by the large and powerful space crafts which would have large propulsion systems. These space crafts would also have huge reactors that would be powered by something nuclear and very powerful in order to make such space crafts go with the speed of light during the fast travel. Besides, space travel could give an opportunity to visit other planets which have other life forms. Space travel would be great as people would be ready to communicate with representatives of other planets. Of course, the experience of being in the outer space would be overwhelming for everyone.

In order to have an opportunity to travel economically to space and for the successful development of space tourism industry, it is necessary to build powerful reusable launch vehicles or space crafts. As today the commercial transport industries use multiuse vehicles, including aircrafts, trains, buses and etc., the commercial space transport industry should also have high quality space crafts. Today it is one of the main goals of scientists and engineers to develop low-cost reusable space crafts which could have all the necessary characteristics for safe space travel. According to the researches, there are a lot of interesting projects developed by the scientists, engineers and programmers from all over the world. It is not a secret that a lot of space planes that can take off like an airplane and can fly to orbit have always been a dream of a number of space engineers and science fiction writers.

Task 3

Read the texts below. Match choices (A – H) to (11–16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

The Perfect Vacation or Visit Begins with a Train Journey.
6 Fun Things to Do while Travelling by Train.

11. The long train ride is a perfect excuse to give yourself to some favourite hobby. You may like to write, or draw, or compose music. You can do all these things in the comfortable seats of the train while you wait to reach your destination.

12. Another fun thing to do on a train, and very profitable, is to study something. Have you long wanted to study Spanish? There is a mobile application that helps you. Do you want to improve your sketching skills? You only need paper and pencil. Knowledge is at your fingertips and the train gives you the perfect setting to know something.

13. If you are impatient to get to your favourite place, you can take advantage of the trip on the train to know more about where you are going. Get some maps, look for the best places to eat and find the hidden spots you cannot miss are other ways to have fun on a train journey.

14. Trains are means of transportation that allows people to move comfortably and meet new people. A long train ride can be a lot more fun if you spend time getting to know someone or telling someone about you. Do not miss the opportunity to experience this unique experience.

15. Train lovers know the experience of travelling by train very well and enjoy it every time. The last fun thing to do during a train trip is to discover the wonderful aspects of this mean of transport. Relax and be carried away by the sensations, the noises and the silences to discover why trains fascinate so much.

16. Another great way to spend a train journey is to rest. You can use this quiet time to drink water, enjoy the landscape without worries, do some light stretches or even walk a little by the train for a change. Some people take advantage of this time to use beauty products, journals, or just completely relax with some breathing exercises.

Task 4

Read the text below. Choose from (A – H) the one which best fits each space (17-22). There are two choices you do not need to use. Write your answers on the separate answer sheet.

Benefits of Ecotourism

Ecotourism has its advantages and these can be (17)________, the local community or even the host country. Ecotourism is educational to the tourist. By travelling to new places the tourist learns about local plants and animals that he’d otherwise not have encountered. The traveller also (18)________ of the local culture this ensures that one learns to appreciate and respect other people’s beliefs. Ecotourism brings the tourist closer to nature, (19)________ along with new perspectives on life and other people. It takes them to places less travelled and gives them a wonderful new experience without harming the environment.

Ecotourism benefits the local community (20)________ of employment and infrastructural development. The locals surrounding the national parks or whatever conservation project can benefit from them as the government or foreign investors require services which can be (21)________. This in turn also ensures that fewer people migrate to the cities. The local population (22)________ which guarantee that they are not totally dependent on the limited natural resources. Some of the areas may be remote and tourism ensures that infrastructure facilities like water supply and schools are provided in order to keep the locals happy and ensure good services.

A opens up the tourist’s mind to new ideas
B provided by the locals
C as it enables the provision
D gets a deeper understanding
E work on a wide range of projects
F gains new skills
G as providing traditional advisory services
H as an impact to the tourist
To Travel or not to Travel

I have always been thinking if the cost of travelling (23) **compensates** the experience. Travelling is such a pleasure. Imagine going around the world experiencing all the different things that aren’t the same in your home country. Travelling gives you a great thing to put on applications because it shows that you are (24) **flexible** to travel and understand travelling for work.

With travelling you could literally go anywhere in the world. You could never **drive** out of different places to visit because there are so many! Entering a new country usually changes your views about everything.

Another thing with travelling is the cultural exchange you get. The best way to do it is communicating with local people. So, I usually tend to **walk** away from all the touristy areas to feel more like the locals. **Thus**, travelling does have a disadvantages – the cost. Travelling not by yourself but with your family along is more expensive. But one way to **cross** is going on cruises. They are the best for big families and if you want to **realize** many places in a short period of time.

Another tip to reduce the cost of travelling is to follow other travellers’ advice. Some of them **write** blogs, travel vlogs on YouTube Channel and post pictures on Instagram to keep a record of their journeys and let people back home know what they’re **away** to as well as share their travel tips, costs and stories. This information can help other travellers’ budget for their trip and keep an eye on their spendings. All in all I think travelling is worth taking!

Read the text below. Match choices (A-H) to (1-5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

The History of Football

1. ____________

The first known examples of a team game involving a ball, which was made out of a rock, occurred in old Mesoamerican cultures for over 3,000 years ago. According to the sources, the ball would symbolize the sun and the captain of the losing team would be sacrificed to the gods. The first known ball game which also involved kicking took place in China in the 3rd and 2nd century BC under the name Cuju. Cuju was played with a round ball on an area of a square. It later spread to Japan and was practiced under ceremonial forms.

2. ____________

The most admitted story tells that the game was developed in England in the 12th century. In this century, games that resembled football were played on meadows and roads in England. Besides from kicks, the game involved also punches of the ball with the fist. It took, however, long time until the features of today’s football had been taken into practice. For a long time, there was no clear distinction between football and rugby. There were also many variations concerning the size of the ball, the number of players and the length of a match. An attempt to create proper rules for the game was done at a meeting in Cambridge in 1848, but a final solution to all questions of rules was not achieved. Another important event in the history of football came about in 1863 in London when the first Football association was formed in England. It was decided that carrying the ball with the hands wasn’t allowed. A consequence of the London meeting was that the game was divided into two codes: association football and rugby.

3. ____________

Football Association Challenge Cup (FA Cup) became the first important competition when it was run in 1871. The following year a match between two national teams was played for the first time. The match that involved England and Scotland ended 0–0 and was followed by 4,000 people at Hamilton Crescent. Twelve years later, in 1883, the first international tournament took place and included four national teams: England, Ireland, Scotland and Wales. In 1908 would football for the first time be included as an official sport in the Olympic Games. Until the first FIFA World Cup was played in 1930, the Olympic Games football tournament would rank as the most prestigious on a national level. Women’s football was not added until 1996.

4. ____________

No other sport event besides the Summer Olympic Games can today measure itself with the FIFA World Cup. The first edition of the FIFA World Cup was played in 1930 in Uruguay and has since then returned every fourth year (with two exceptions due to the Second World War). In 1991 the first World Cup for women was held in China and has since then also returned every fourth year. Today the biggest global tournament for clubs is the Champions League (played since 1992), the former European Cup (1955–1991).

5. ____________

In the late 19th century, only a few national football teams existed; England and Scotland had the first active teams that played games against each other in the 1870’s. Today there are 211 national associations included in the Fédération Internationale de Football Association (FIFA), the world governing body of the sport. The number of nations participating in the World Cup qualifiers increased from 32 in 1934 to over 200 in 2014. The world regions have been divided into six confederations.

The Olympic Games

For the ancient Greeks, the Olympic games existed since mythical times, but no definitive time of their inauguration can be identified with any certainty. The first Olympiad was held in 776 BC, and this is the year that provides the first accurate chronology of Greek history. The athletic games were held every four years during the second (or possibly the first) full moon in August, and the festivities lasted five days.

Only free male Greeks were eligible to participate in the games, and they came from all corners of the Mediterranean, including colonies from Magna Grecia and the Pontus. Slaves and women were banned from the sanctuary under penalty of death. Women however were allowed to sponsor events, teams, athletes. In addition, a competition with exclusive events for boys were introduced in 632.

During the games warring Greeks had to cease all hostilities because it was mandatory to participate in peaceful assembly. To this end, officials from Olympia travelled ahead of time throughout Greece to announce the assembly and to proclaim the ekecheiria, the ceasing of all hostilities (for up to three months) so all participants can find safe passage to the sanctuary.

More importantly, the games reflected the Greek's ideals that have won them admiration for millennia to come: the free individual who aspires to achieve excellence through an agon (struggle, or contest) governed by just laws. Just like the games, Greeks in their everyday lives competed intensely with each other in the political realm, in the economy, and in the battlefield. They competed by placing enormous importance on the value of the individual, and by respecting the rule of law that was above all.

Initially, the games were a local affair and the only event was the sprinting race, but in the 8th and 7th centuries BC wrestling, boxing, and equestrian events were added, as well as the pentathlon (an event that combined running, long jump, discus and javelin throwing, and wrestling), and the pancration which was a vicious form of boxing with little to no rules. The Olympics in ancient Greece also included poetry and writing competition, and it provided a peaceful ground where Greeks discussed and forged agreements on military, commercial, and political matters.

Winning an Olympic event bestowed fame and great honour to an athlete. The winners were announced by a herald following each event, and they were rewarded with a humble wreath. Tradition holds that cities will welcome back their Olympic winners by symbolically demolishing part of their defensive walls.

The modern Olympic revival began in 1896. Since then, the Olympics have occurred every four years in different countries (interrupted only by the two World Wars), and they have become one of the largest sports entertainment events in the world, drawing billions of dollars in revenues, and enjoying wide participation by the vast majority of nations. As a tribute to their ancient roots, before each Olympic event the Olympic flame is initiated in ancient Olympia, in the temple of Hera. In an imaginative choreography that depicts the ancient Vestal Virgins, the Olympic torch is ignited by sun rays concentrated by a concave mirror on its tip. From Olympia then this flame travels in a festive relay to the country which holds the games and eventually lights
up an elaborate cauldron to mark the start of the games. The flame burns for the duration of the Olympics, and its extinguishing marks their closing.

Medicine Courses at the University of Queensland

11. Clinical Practice 2 course will build on the foundation of knowledge and skills established in the previous course to further develop and demonstrate knowledge and skills in history-taking, patient examination, communication, clinical reasoning and procedural skills. It consists of five areas: Clinical Coaching, Clinical Communication, Procedural Skills, Masterclasses and Professional behaviour. In Clinical Coaching students are taught the history taking and examination skills integral to medical consultations. Students cover the five major body systems over the year in Clinical Practice 1 & 2. Clinical Communication Skills concentrates on the process of communicating with patients using history taking as the context. A biopsychosocial model underpins the theory that the students learn and then demonstrate.
12. **Ethics and Professional Practice 3.** This course provides a deeper engagement with the ethical, professional and legal obligations of the doctor consistent with the second year of the medical program. Problem-solving skills in the context of the clinical consultation necessarily include consideration of the ethical and legal aspects of the presenting problem and its management. These skills develop in conjunction with developing analytical and communication skills. The course will involve a combination of lectures, web-based resources and readings.

13. **Health, Society & Research 3** course is the third in a sequence of courses, which develop core concepts in public health, health systems and research. The course will examine the role of health services, communities and community organisations in the prevention of disease and the promotion and maintenance of health across the lifespan: from early childhood through to older age. The course will focus on students learning how to review research.

14. **Integrated Clinical Studies** course is designed to integrate learning across semesters 1, 2 and 3 of the Medical Program. It is using the case-based learning (CBL) model supported by lectures and practicals to revise, extend, and integrate key clinical science and public health concepts. There is a significant research component. The course will revolve around case presentations adapted from the Australian Curriculum Framework for Junior Doctors.

15. **Creative Writing for Clinical Excellence** course for medical students aims to develop skills in observation, communication, description, and self-expression. This course has particular emphasis on building compassion and empathy towards patients through perspective-taking in narrative stories. Special Features: The course is taught by leading creative writing authors who are based at or affiliated with the University of Queensland: A/Prof Kim Wilkins, Dr Nick Earls, Shastra Deo, and Charlotte Nash.

16. **Urban LinCC** This course provides a clinical experience in community-based medicine. Students will attend an urban general practice for 1/2 day per week over 14 weeks with the aim of improving their communication, history taking, examination and clinical reasoning skills. They will observe and interact with patients under the guidance of an experienced general practitioner and develop an understanding of the care of patients within the community. Students will be invited to submit an application to participate in the course. The application will require answering the questions why you wish to participate in the course and give an example of an activity that required self-directed learning.

2022 Winter Olympics Ice Hockey Qualifying: GB Miss out after Defeat

Myers (33) _____________ the only goal for Britain in the first minute of the third period. Great Britain’s men’s ice hockey team missed out on the 2022 Winter Olympics following a 4–1 defeat against
Hungary in Nottingham. GB needed a win in the final pre-qualification event to the final qualifying tournament in August. But they were 2–0 down in the second period and though Matthew Myers made it 2–1 early in the third with his 19th international goal, it was not enough. Britain a place in the Olympics for the first time since 1948. They had lost five of their previous eight meetings with Hungary but had fond memories of their encounter in April 2018.

GB’s Davey Phillips had a shot cleared off the line, before the visitors and Istvan Sofron settled the contest in style as Hungary sealed their place in one of three final-stage qualifying groups in Latvia. Skipper Jonathan Phillips lamented: “We dominated that game from start to finish. Their goalie played unbelievable and they took their chances so I guess it just wasn’t to be.”

Task 1

Read the text below. Match choices (A – H) to (1–5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

3D Printing: the Future of Food Production?

1. ________
   3D printing is becoming more and more popular. We are now able to print things such as clothing, prosthetic limbs, musical instruments and prototype cars. People and businesses are able to create the things they need very quickly and easily using 3D printers. But can you imagine printing food?

2. ________
   Some scientists are trying to revolutionise the dining experience by doing this. They hope that having a 3D printer in the kitchen will become as commonplace as the microwave or blender. Scientists say that they are easy to use: you simply have to select a recipe and put the raw food ‘inks’ into the printer. You can also modify the instructions to make the food exactly how you want it. This means that it would be very quick and easy to create tasty and nutritious meals.

3. ________
   Using 3D printers to create your meals would also be saving the environment. There would be less need for traditional growing, transporting and packaging processes as food production would be a lot more efficient. For example, alternative ingredients such as proteins from algae, beetroot leaves and insects could be converted into tasty products!

4. ________
   Printing food could also help people who suffer from dysphasia (a swallowing disorder). Elderly people also consider it difficult to chew and swallow. So, the pureed food can make it easier for them and to relieve pain. One of the ways it does this is through novel designs and textures. The technology employed enables to create foods that appear enticing to this category of people. They could program the printer to print softer versions of their favourite foods so that they would not have trouble swallowing them.

5. ________
   However, some people think that a future of 3D-printed food would be a disaster. It could take away many jobs, including those for growing, transporting and packaging food. Imagine a world where there was no need for farming or growing crops and the same tastes and textures could be printed from a raw ‘food ink’. Likewise, traditional cafés and restaurants might lose business. Also, there are concerns about the nutritional value of printed food: is it really possible to get the nutrients we need from food-based inks and gels? What’s more, cooking and eating together with family and friends has long been a traditional and enjoyable activity. It is hard to imagine a world where the pastime of cooking is dead and meals can be created at the touch of a button.

A 3D food printing makes everyday life easier.
B Harmful consequences of printed food production to individuals and society.
C Increasingly extensive use of 3D printing.
D Traditional food production processes would be more efficient.
E Environmentally friendly technology.
F Production of 3D-printed food would have disastrous environmental effects.
G New possibilities for the groups with special needs.
H New food production technology would simplify cooking and save time.

Task 2
Read the text below. For questions (6–10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Video Games are Good for You!

For years video games have been criticized for making people more antisocial, overweight or depressed. But now researchers are finding that games can actually change us for the better and improve both our body and mind.

Games can help to develop physical skills. Pre-school children who played interactive games have been shown to have improved motor skills, for example they can kick, catch and throw a ball better than children who don’t play video games. A study of surgeons who do microsurgery in Boston found that those who played video games were 27 per cent faster and made 37 per cent fewer errors than those who didn’t. Vision is also improved, particularly telling the difference between shades of grey. This is useful for driving at night, piloting a plane or reading X-rays.

Games also benefit a variety of brain functions, including decision-making. People who play action-based games make decisions 25 per cent faster than others and are no less accurate, according to one study. It was also found that the best gamers can make choices and act on them up to six times a second, four times faster than most people. In another study by researchers from the University of Rochester in New York, experienced gamers were shown to be able to pay attention to more than six things at once without getting confused, compared with the four that most people can normally keep in mind. Additionally, video games can also reduce gender differences. Scientists have found that women who play games are better able to mentally manipulate 3D objects.

There is also evidence that gaming can help with psychological problems. At the University of Auckland in New Zealand, researchers asked 94 young people diagnosed with depression to play a 3D fantasy game called SPARX and in many cases, the game reduced symptoms of depression more than conventional treatment. Another research team at Oxford University found that playing Tetris shortly after exposure to something very upsetting – in the experiment, a film of traumatic scenes of injury and death was used – can actually prevent people having disturbing flashbacks.

The effects are not always so positive, however. Indiana University researchers carried out brain scans on young men and found evidence that violent games can alter brain function after as little as a week of play, affecting regions in the brain associated with emotional control and causing more aggressive behaviour in the player. But Daphne Bavelier, one of the most experienced researchers in the field, says that the violent action games that often worry parents most may actually have the strongest beneficial effect on the brain. In the future, we may see many treatments for physical and neurological problems which incorporate the playing of video games.

6. Only relatively recently people have started to realize _______.
   A the harmful effect of video games
   B the beneficial effect of video games
   C how harmful video games are to gamers’ physical condition and mental health
   D how much video games affect the people that play them
7. What is TRUE according to the text?
   A Women who play video games demonstrate better spacial reasoning.
   B Women who play video games demonstrate faster reaction speeds.
   C Women who play video games demonstrate reduced stress levels
   D Women who play video games demonstrate better multitasking ability.

8. Video gamers’ decision-making speed is significantly improved by ________.
   A years of gaming experience
   B long periods of game playing
   C playing video games in short bursts
   D playing certain types of video games

9. According to the text, the video game Tetris helps people to ________.
   A improve their concentration
   B overcome depression
   C forget anxious experiences
   D make decisions faster

10. From the text we can say that violent video games ________.
    A have no negative effects on players
    B only affect players’ brains after extended hours of play
    C may have positive and negative effects on the brain
    D only affect players’ brains in beneficial ways

Task 3

Read the texts below. Match choices (A – H) to (11–16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

Robots: Friend or Foe?

What is the future of artificial intelligence (AI)? Will it be possible for robots to be autonomous? If so, when will that happen and will it be a good thing? We asked four experts what they think.

11. I would say that we are quite a long way off developing the computing power or the algorithms for fully autonomous AI, though I do think it will happen within the next thirty or forty years. We will probably remain in control of technology and it will help us solve many of the world’s problems. However, no one really knows what will happen if machines become more intelligent than humans. They may help us, ignore us or destroy us. I suppose that AI will have a positive influence on our future lives.

12. I have to admit that the potential consequences of creating something that can match or surpass human intelligence frighten me. Even now, scientists are teaching computers how to learn on their own. At some point in the near future, their intelligence may well take off and develop at an ever-increasing speed. Human beings evolve biologically very slowly and we would be quickly superseded. In the short term, there is the danger that robots will take over millions of human jobs, creating a large underclass of unemployed people. This could mean large-scale poverty and social unrest. In the long term, machines might decide the world would be better without humans.

13. Personally, I think it’s fascinating to consider how we’ll speed up our evolution as a species by augmenting our bodies. Imagine if you could implant a computer inside our brain! Soon we’ll be able to do
just that and enhance our mathematical ability, audiovisual perception and our memory, and this idea is only going to become more and more commonplace.

14. AI is popping up in the world around us. Recent developments include self-driving cars and drones carrying life-saving equipment to people at sea. Granted, there have been a few teething problems: one woman who was asleep on the floor had her hair eaten by her robot vacuum cleaner and there have been fatal accidents with self-driving cars. But progress always comes at a cost, and for me the advantages far outweigh the disadvantages.

15. I’m a member of the Campaign to Stop Killer Robots. Forget the movie image of a terrifying Terminator stamping on human skulls and think of what’s happening right now: military machines like drones, gun turrets and sentry robots are already being used to kill with very little human input. The next step will be autonomous ‘murderbots’, following orders but ultimately deciding who to kill on their own. It seems clear to me that this would be completely unethical and dangerous for humanity. We need to be very cautious indeed about what we ask machines to do.

16. There was a time when functional robots were just figments of the imagination but that is not so. Today, technology has progressed to a point that people can enjoy the benefits of robotics in their everyday lives. From robot pets to robot vacuum cleaners and even robotic limbs these inventions are going to change the way people live for sure. This is very promising especially in the military field because pretty soon soldiers will no longer need to be sacrificed in the front lines.

Which expert ___________

A thinks that it is extremely interesting to observe how fast humans can change
B is sure that AI will influence our future positively
C warns about obvious hazards to human life
D is sure that AI will be entirely independent in the next few decades
E believes that robotics has a great perspective to save a lot of people’s lives
F says that scientists are studying how computers are learning
G holds the opinion that benefits of AI prevail over the negative aspects
H is scared of possible far-reaching effects for society

Task 4

Cooking Up a Life-changing Invention

When 18-year-old Richard O’Shea from County Cork, Ireland, won top prize at the BT Young Scientist & Technology Exhibition 2019 for his project entitled “A biomass-fired cooking stove for developing countries”, he couldn’t contain his excitement. Richard had designed a stove that hot using no more than scraps of wood and that (17) __________. Not only that, it could be built from old tin cans and nails using just a Swiss army knife. As Richard explained to the judges: “Every day more than two billion people in the world have to cook their food without electricity, on stoves that (18) __________. And every year, thousands of people in developing countries die from smoke inhalation from cooking on these stoves in poorly ventilated homes. My design makes possible to build highly efficient, almost smoke-free stoves from everyday items. Hopefully, they can (19) __________.”

As the winner of the competition, Richard received a trophy and a $5,000 prize, together with a $5,000 travel bursary to (20) __________. He also was given the honour of representing Ireland in the annual EU Young
Scientist Competition. The competition judges said Richard had made a very strong impression on them for coming up with a design that used simple materials that are very easy to find in third-world countries.

Richard now wants to (21) _______ as quickly as possible. He is currently working with charities to make this happen. Asked if he ever considered commercialising his design, Richard said: “This is not about making money. I don’t want to (22) _______. I just want to get the stove into the hands of the people who need it as soon as possible”. Richard’s selflessness and enthusiasm make him a true role model for the youth of today!

A market my product
B improve the lives of people in the developing world
C visit Africa to test his stove
D produced almost no smoke
E helping people in the poorer countries of the world
F get his stove to developing countries
G working in Africa
H use wood as fuel

Task 5

Read the text below. For questions (23–32) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

The Ig Nobel Prize

Most scientists dream of (23) _______ a Nobel Prize. It is the greatest award a scientist can be (24) _______ with and often comes after decades of careful research. Most often, winners are scientists who have (25) _______ important questions about existence or made discoveries that have helped advance the human race. But not every scientist works on (26) _______ projects that, for instance, try to cure diseases or (27) _______ life on other planets. There are also scientists who spend their time on the simpler, more mundane questions of science. Take, for example, the group of scientists from Newcastle, UK, who worked (28) _______ the fact that cows with pet names produce more milk than cows without pet names; or the team of Australian mathematicians who studies how many times you have to take a group photograph to make (29) _______ everyone has their eyes open. Both of these research projects were awarded not Nobel Prize, but Ig Nobel Prizes. The Ig Nobel Prizes began in 1991 to honour scientists who first make people laugh and then make them think. They are organized by a magazine called Improbable Research and, since 1995, the (30) _______ have been presented at a ceremony in Harvard University, USA. The committee that chooses the winners often (31) _______ former Nobel Prize winners as well as university lecturers and sci-fi writers. And (32) _______ the fact that the ceremony often involves lots of fun and laughter (including tradition of throwing paper airplanes onto the stage), the organizers always emphasise that the prizes are not meant to make fun of the winners. In fact, most winners thoroughly enjoy the occasion and fly across the world just to collect their awards.

It’s All in the Genes

Our genes help to determine everything about us, from our physical appearance, to how we behave, to what diseases we are likely to get. In 1990, scientists embarked on an ambitious project: to identify every single one of the 25,000 or so genes that make up the human genome. Scientists now know the identity of all of our genes (although they have yet to figure out 33 ______ most do). Scientists say this knowledge brings them much closer to 34 ______ effective treatments for hundreds of illnesses. So far about 10,000 diseases 35 ______ that are caused by faulty genes. Scientists are confident that one day they will be able to cure diseases 36 ______ Huntington’s disease by introducing healthy copies of genes into the bodies of people who have faulty genes. However, this day is still a long way off, as tremendous technical difficulties must be overcome before genes therapy becomes a reality.

Our genes not only determine our susceptibility to various diseases. They 37 ______ determine how we respond to medicines! 38 ______ particular drug may cause side effects in some people, not work for 39 ______, while with yet others it may even make the illness 40 ______! Every year over 100,000 people die from the adverse effects of medicines, and another 2.2 million experience serious reactions.

Doctors wish they 41 ______ certain how a patient would respond to a medicine before they give it to them. Scientists say that once they 42 ______ how specific gene variations respond differently to medicines, doctors will be able to prescribe medicines based on an individual’s unique genetic profile.

Task 1

Read the text below. Match choices (A – H) to (1–5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

5 Uncomfortable Truths about Living in Alaska

ALASKA is one of the most beautiful and unspoiled places in the world. It is an environment of coastal mountains, vast unspoiled tundra, ice fields, and rivers teeming with fish. As idyllic as this state is, life here in Alaska is not without its challenges.

Here are 5 uncomfortable truths about living in Alaska.

1. ________

The hazards of the 49th state are frequently exaggerated, but they’re not complete works of fiction. According to the bureau of vital statistics, roughly 400 people a year succumb to an untimely dying in Alaska making it the second most deadly state in the Union. Although bear attacks always make headlines, they are few and far between compared to the number of people who fall out of boats, break through frozen lakes, or simply die of exposure in the extreme cold. As moribund as that sounds, the largest number of accidental deaths are far less dramatic. Dozens of Alaskans die each year in their sleep from carbon monoxide poisoning due to faulty heaters or clogged chimneys.

2. ________

Every winter thousands of Alaskans get SAD. More than just a little down in the blues, they become crippled by the symptoms of Seasonal Affective Disorder (SAD). Given its geographic place on the planet, winter in Alaska is not just cold, it is dark. Daylight in the northernmost regions is nonexistent for months at a time creating a physiological shift in mood and disposition. Sufferers of SAD often experience anxiety, malaise, and deep depression. In an attempt to cope many turn to overeating, extended periods of sleep, booze, or drugs. As the symptoms become more severe this can be a causation of suicide. Alaska ranks second only to Wyoming for the highest rate of suicides in the country.

3. ________

Tourism is the second largest industry in Alaska. About 2 million tourists visit the state each year, more than half arrive by ship. As one of the most popular cruising destinations in the world, more than $60 million dollars in revenue is collected by coastal towns through docking fees and other taxes. But the cost to the environment is incredible. Despite strict environmental regulations and diligent watchdog groups, cruise ships continue to pollute the pristine waters they run. According to the Environmental Protection Agency, a typical cruise ship produces 21,000 gallons of raw sewage, 2,000 pounds of garbage, 170,000 gallons of wastewater, and 6,400 gallons of oily bilge water from their engines. Regulations or not, cruise lines caught violating wastewater and air quality standards usually commit repeat offences.

4. ________

As beautiful and unspoiled as it is, Alaska is a difficult place to inhabit. The climate is harsh and the rigors of daily life can extol a heavy price. For some residents, the stress of Alaskan living boils over into violent conflicts. According to statistics provided by the FBI and the United States Census Bureau, Alaska is second to only Tennessee as the nation’s most violent state. Despite higher than average incomes, a low poverty rate, and a rare population density, violent crimes are surprisingly frequent. The Anchorage Daily News reported that more than 37% of all Alaskan women reported some form of sexual assault.

5. ________

The largest employer and biggest driver of revenue in the state, the oil industry reigns supreme in Alaska. Even those not directly affiliated with oil production or transport get a cut of the action. The Alaska Permanent Fund was established in 1976 to allow all full-time residents to buy oil stocks. Each year the state pays residents a cash dividend, the largest was in 2008, when every Alaskan received more than $3,200 in the mail.

Task 2

Read the text below. For questions (6–10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Euthanasia: Life or Death

Euthanasia is the termination of an extremely ill person’s life in order to relieve them from the suffering the illness is causing. Euthanasia is usually only conducted on a person with an incurable condition, however there are other instances when euthanasia can be carried out. In many countries, such as the UK, it is illegal to assist anyone in killing themselves. Should a terminally ill patient in a great deal of pain and discomfort be allowed to terminate their life, if that is what the patient desires? And who has the right to deny a patient who is in complete suffering a less painful ending to their lives? These questions cause a huge amount of controversy, and have been strongly debated. Those in favour of euthanasia argue that it should be up to the patient, whereas those against argue that euthanasia could be misused, leading to very disturbing situations.

A strong ethical argument against the use of euthanasia is that it could soon become a slippery slope, with the legalisation of involuntary euthanasia following it. Since involuntary euthanasia is indistinct from murder it would be impossible to regulate, causing the danger of murderers not being brought to justice, due to their crimes being passed off as involuntary euthanasia. There is also concern that doctors could end up killing very sick patients without asking for their permission, and in the worst case scenario, begin to kill off patients to free up beds in hospitals, or to save money. These situations show how dangerous it could be to let the legalisation of euthanasia lead into the legalisation of involuntary euthanasia.

On the other side of the debate, there is a strong argument that people should have the right to terminate their lives, whenever, and however they may wish. Many supporters of voluntary euthanasia believe that everyone has the right to control their body and life, and should be free to decide at what time, and in which manner they will die. The idea behind this is that unnecessary restraints on human rights should be avoided. Since the right to life gives a person the right to not be killed if they do not want to, proponents of euthanasia argue that respect for this right will prevent euthanasia being misused, as killing a patient without their permission would violate their human rights. It can also be argued that because death is a private matter, if there is no harm to any other people, there is no right to deny someone’s wish to die. Supporters of this believe that if euthanasia promotes the best interests of all the parties concerned, and no human rights are violated, then it is morally acceptable for voluntary euthanasia to take place.

Another argument against euthanasia, this time a practical one, is that euthanasia is not needed when proper palliative care (an approach that improves the quality of life) is available. Terminally ill patients are given drugs and other types of support to help relieve the physical pain and mental effects of being terminally ill. Not all of the trauma experienced by a patient is physical however, and drugs alone cannot relieve the
emotional pain felt by someone counting the days until their death, although the emotional support that can be provided from palliative care can go a long way to make the last part of a terminally ill patient's life less emotionally stressful. Effective palliative care will give the patient and their loved ones chances to spend quality time together, and will allow the patient to live the remaining part of their lives with as much of the distress and pain felt by a terminally ill patient removed as possible. Some argue, however, that along with the introduction of euthanasia, there could be a reduction in the availability of palliative care, as euthanasia is more cost effective than prolonging the life of dying patients. This could possibly reduce the availability of care for terminally ill patients who do not wish to be euthanised.

People generally avoid death because they enjoy and value being alive, but in the case of a terminally ill patient, they may be in a lot of discomfort and pain, and are unable to enjoy their life. This may cause the patient to devalue their life, and the patient may decide that they do not wish to endure their suffering any longer. There is also the fact that although the patient themselves may wish to be euthanised, it may have a very detrimental effect on the family of the patient. Those in favour of this argument believe that since the death of a patient in that situation could be a better option to keeping them alive, the patient’s wish should be respected.

10. It is better for a terminally ill patient_____
    A To be terminated his life voluntarily.
    B To respect the relatives’ will.
    C To be euthanized involuntarily.
    D To avoid death because he suffers.
Task 3
Read the texts below. Match choices (A – H) to (11-16). There are two choices you do not need to use. Write your answers on the separate answer sheet.

Guns Used as Weapons or Protection

Guns are extremely powerful weapons. They can cause destruction, harm or even death. At the same time, they can also be used to defend and protect or to threaten and kill. Issues involving the ownership and possession of guns have led to heated debates in various countries and states. Today, there are still many different views on whether gun ownership should be legalized or banned in a society.

11. Individuals who are against the legalization of gun ownerships argue that private citizens do not need a gun for self-defence because the police are there to protect them. However, supporters claim that police cannot protect everyone and every piece of property all of the time. For example, dialling 999 will only inform the police. They are still at least several minutes late and the robbers or criminals are not going to wait that long. In addition, the police have no obligations to provide timely protection to every member of society. For this reason, it is foremost the responsibility of individuals to protect their own interests.

12. Owning guns does not necessarily mean you have to use it for criminal purposes; in fact, it does have law-abiding gun owners and they owning are mainly for protection or to enjoy the hobby of hunting. Hence, it is unwise for the government to ban guns just because the mobster chooses to abuse guns.

13. The crime and mortality statistics are popularly brought upon and quoted whenever the cons of gun ownership come under discussion. Some reports state that crime is common in countries where the citizens are given the chance to protect themselves with guns or firearms. Some research concludes that crime rates between comparison of countries with gun control and countries without gun control are nearly equivalent to one another.

14. Some people may argue that having a gun would act as a self-defence. But studies show that pulling out a gun with no intention to kill the assailant may end up inducing rage or an uncontrolled situation instead. Sometimes, waving the gun in attempt to scare off the assailant may end up with the assailant grabbing the gun from you. This would result in reverse scenario, where you are at the mercy of the gun instead. One may hold a gun, but would still not be prepared to shoot to kill or wound the assailant.

15. Not a very new thing, as this has happened before in the past, with the case of President Abraham Lincoln and Martin Luther King Jr. They were both outstanding persons and influential people who were killed using guns by people with different views than theirs.

16. Guns are very often used in unlawful activities, whether robbery, burglary, rape or sexual assault, aggravated assault and simple assaults. Easy access to a firearms license makes it easier for criminals to do their skulduggery. In 6.3 million of violent crimes, firearms are used in estimated 533,000 of these incidents, making up around 8% of the total number.

Each day approximately 6,300 people die and what makes this haunting is that presently there are 83,513 people (17) ______________, yet each day 17 people die because they do not receive a transplant. These statistics show that people who are waiting for organ transplants have a good chance (18) ______________. The sad truth is though, because of the lack of people willing to donate organs, many people will continue to wait for organs to save their lives. Waiting lists of patients for organ transplants become longer (19) ______________. We are not talking about people selling organs; we are talking about people who are dead and whose organs are available for salvage. There is a huge shortage of organs, but (20) ______________, they would see the many benefits of this important endeavor.

When someone is pronounced dead, and not until then, the doctors will then present the choice for donation. Since one is dead and can’t give their consent, it is marked on their driver’s license whether they are a donor or not. Unfortunately, (21) ______________ actually sign a donor card. If yes, their organs should be donated, but a problem that is arising more and more is that families of the deceased are overriding the choice of the dead, and saying no to donation. More than half of the eligible donors refuse to donate their recently deceased family member’s organs because they don’t know how the deceased felt about organ donation. This brings about a lot of debate. If the person (22) ______________, something so incredibly important, their families should not have the right to overturn their decision about their own body. This is an issue that is causing the loss of many donations.

Module 11
Houses & Homes
Task 1

Read the text below. Match choices (A – H) to (1–5). There are three choices you do not need to use. Write your answers on the separate answer sheet.

Homes Differ

1. __________
   Detached houses are more likely to be the property types we all dream of owning. They tend to be more private as they are single standing properties, and do not share walls with other houses. Due to its privacy, detached houses are a lot more expensive and high in demand.

2. __________
   Semi-detached properties are a lot more common for homeowners to purchase/rent. There are a lot more semi-detached properties in the UK as they save a lot of space as they are houses paired together by a common wall. Semi-detached properties are fantastic options for homeowners to extend at the back and side and have an element of privacy too.

3. __________
   A manor house was historically the main residence of the lord of the manor. The house formed the administrative centre of a manor in the European feudal system; within its great hall were held the lord’s manorial courts, communal meals with manorial tenants and great banquets. The term is today loosely applied to various country houses, frequently dating from the late medieval era, which formerly housed the gentry.

4. __________
   When you think of a cottage, you automatically associate the British rural countryside and more times than not, cottages have and will always be in the rural regions of the UK. Cottages were purposefully built to have thick walls to withstand the bitter cold weather, small windows, structural pillars, low ceilings and most distinctively a thatched roof. Cottages in the middle ages were built for agricultural workers and their families. Modern cottages now have all the comforts of any home in the country, including electricity and running water.

5. __________
   The word 'bungalow', originates from the Indian word ‘Bangla’, which in the 19th century referred to houses that were built in a Bengali style. Houses that were made in Bengali style were traditionally very small and only one storey high and detached. A wide veranda was adopted by the British as well as low roofs. The distinction of a bungalow compared to a cottage is that of style, history and the price tag. Bungalows are generally a lot cheaper to purchase. Bungalows were appropriate housing types to deal with tropical climates such as South East Asia where many bungalows originated.

A High-rise block of flats.
B A house type which is currently out of fashion.
C A house for people who can afford to live without neighbours.
D The most ancient type of house.
E The countryside traditional house.
F The house ‘borrowed’ from the Orient.
G A house for those who do not mind having close neighbours.
H A type of house intended for child free families.
Task 2

Read the text below. For questions (6–10) choose the correct answer (A, B, C or D). Write your answers on the separate answer sheet.

Holiday Home

We visited this area a couple of times and we really liked it. We looked at some very remote places but decided to be in a town. It was important to us that it was easy to get to for short holidays too so the fact that there is an airport nearby was a key factor. And finally we were looking for somewhere in contrast to where we live the rest of the year. We love both of our houses even though they are very different in style and in very different places. How did you find this particular property? We did some research into the area we liked and we looked at adverts on the Internet, which gave us an idea of what was available. Then we went to an agency which specialised in property in the area where we were looking. They were really helpful and in three days they took us to a number of different houses as well as some empty plots of land with potential for building a new property.

It's not a big house; there are only two bedrooms, but it is exactly what we were looking for. It has a fantastic terrace with views of the mountains and because it is high up we can see right over the town too. It's very picturesque. It has a wonderful big fireplace too so is nice and warm in winter. In fact it is a beautiful place to have a holiday at any time of the year.

We spend lots of holidays here ourselves and sometimes friends and family join us, but we also let friends and family stay in it by themselves if they want to. It means the house is occupied more, and the more it is used the better. It would be a shame if it were empty a lot of the time.

We also like that we have met some good friends here. It is so nice each time we come out to have a group of people to spend time with and social events to go to. We are lucky to have helpful neighbours and friends who live nearby and can keep an eye on the house for us. In the very cold weather last winter the pipe to the outside tap froze and split but the postman noticed and sealed it for us. We had a problem with the hot water tank once too. We arrived one time and turned it on and suddenly water started pouring down the stairs. We were able to get a plumber to come and look at it and then arranged for a new one to be fitted so it wasn't too bad. One advantage of not always being here is that we have been able to have both the bathrooms redecorated. Some friends of ours did all the work for us and it worked out really well.

Next year we will both retire and then we will be able to spend much more time here. We might come for a month or more at a time instead of a week or two as we do now. But we bought it as a holiday home or second home not somewhere to live all the time. We like having both our homes and don't want to give up either of them. We are very lucky that we can enjoy spending time in two lovely houses.

INFINITIVE / -ING FORM

Infinitive/-ing form (the use of the infinitive, the use of the -ing form, the use of the bare infinitive, verbs taking the to infinitive or the -ing form with a change in meaning, participles)

There are two types of infinitives.

Tenses of the Infinitive
The infinitive has four tenses in the active and two in the passive.

<table>
<thead>
<tr>
<th>Tense</th>
<th>Active Voice</th>
<th>Passive Voice</th>
</tr>
</thead>
<tbody>
<tr>
<td>Present</td>
<td>(to) play</td>
<td>(to) be played</td>

<td>(to) have played</td>
<td>(to) have been played</td>
</tr>
<tr>
<td>Perfect Continuous</td>
<td>(to) have been playing</td>
<td></td>
</tr>
<tr>
<td>Active</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The present infinitive refers to the present or future:
I hope to see you tomorrow.

The present continuous infinitive expresses an action happening now:
He appears to be suffering from a cold.
The **perfect infinitive** is used to show that the action of the infinitive happened before the action of the verb.

It is used with verbs such as: *seem, appear, believe, know, claim, expect* and *modal verbs*:

The **perfect continuous infinitive** is used to emphasise the duration of the action of the infinitive, which happened before the action of the main verb:

<table>
<thead>
<tr>
<th>Passive</th>
<th></th>
<th></th>

<tbody>
<tr>
<td>present infinitive: (to) <em>be</em> + past participle</td>
<td></td>

</tr>
<tr>

</tr>
<tr>
<td>Perfect</td>

</tr>
<tr>

</tr>
</tbody>
</table>

The *simple*-*ing* form refers to the present or future. The *perfect*-*ing* form shows that the action of the -*ing* form happened before the action of the verb. We can use the *simple*-*ing* form instead of the *perfect*-*ing* form with no difference in meaning.

The **to infinitive** is used:

- **to express purpose:**

  after certain verbs (*agree, appear, decide, expect, hope, plan, promise, refuse, etc.)*:

  after *would like, would prefer, would love*, etc to express a specific preference:

after adjectives which describe feelings/emotions (happy, sad, glad, etc.); express willingness/unwillingness (willing, eager, reluctant, etc.); refer to a person's character (clever, kind, etc.) and the adjectives lucky and fortunate:

**Note:** With adjectives that refer to character we can also use an impersonal structure:

- after too/enough:

  to talk about an unexpected event, usually with only:

  with it + be + adjective/noun:

  after be + first/second/next/last etc: after verbs and expressions such as ask, learn, explain, decide, find out, want, want to know, etc, when they are followed by a question word:

  **Note:** why is followed by subject + verb, NOT an infinitive:

  in the expressions to tell you the truth, to be honest, to sum up, to begin with, etc:

after *love, like, enjoy, prefer, dislike, hate* to express general preference:

**BUT** for a specific preference (*would like/would prefer/would love*) we use a *to infinitive*:

after expressions such as *be busy, it's no use, It's (no) good, It's (not) worth, what's the use of, can't help, there's no point in, can't stand, have difficulty (in), have trouble,* etc:

after *spend, waste or lose (time, money, etc.)*:

after the preposition *to* with verbs and expressions such as *look forward to, be/get used to, in addition to, object to, prefer (doing sth to sth else)*:

after other *prepositions*:

after the verbs *hear, listen to, notice, see, watch* and *feel* to describe an incomplete action:

**BUT** we use the *infinitive without to* with *hear, listen to, notice, see, watch and feel* to describe the complete action:

**REMEMBER!**

*Help* can be followed by either the *to infinitive* or the *infinitive without to*.

If two *to infinitives* are linked by *and or or*, the *to* of the second *infinitive* can be omitted.

If a verb is followed by a preposition, the preposition will appear at the end of the sentence.

We can use *to* in order to avoid repeating a verb clause.

| Christine loves making crafts. |
| She'd love to go to a peaceful holiday resort. |
| There's no point in complaining when we have no other choice. |
| Joseph spends all his free time drawing. |
| Harry is looking forward to spending the weekend in the mountains. |
| She is interested in acting at the theatre. |
| I watched them rehearsing for the play. (I only watched part of the rehearsal.) |
| I watched them rehearse for the play. (I watched the whole rehearsal.) |
| They helped me (to) write the invitations. |
| I would prefer to stay at home and revise for my test. |
| I used a fountain pen to write my article with. |
| I've never eaten sushi, but I'd love to. |

**The subject of the infinitive:**

- is omitted when it is the same as the subject of the main verb. *They want to go to New Zealand.* *(The subject of the main verb *(want) and the infinitive *(go) is the same *(they).)*

- is *not* omitted when it is different from the subject of the main verb. The subject of the infinitive comes before the infinitive and can be an *object pronoun* *(me, you, them, etc.), a name* *(Cathy)* or a *noun* *(the man).* *He wants her to clean up the mess.* *(The subject of the main verb *(want) is he, whereas the subject of the infinitive clean up) is her.)*

The subject of the *-ing form* can be an *object pronoun,* a *possessive adjective,* a *name* or a *possessive case* when it is different from the subject of the main verb.

*I remember him/his/Sam/Sam's graduating from medical school.*

Too/Enough

**Too** has a negative meaning and shows that something is more than enough or necessary. It appears before adjectives or adverbs and is followed by a full infinitive.

*This exercise is too difficult for the students to solve.*

(NOT: … to solve it.)

**Enough** has a positive meaning and shows that there is as much of something as is wanted or needed. It appears before nouns but after adjectives or adverbs and is followed by a full infinitive.

*There are enough leaflets to give out to everyone. She is experienced enough to lead the group.*

Remember!

**Enough** also appears in negative sentences to show that more of something is wanted or needed.

*I don’t have enough apples to make an apple pie.*

(= I need more apples.)

It is never used before an adjective. Instead we use **quite** or **fairly**.

*She’s quite active.*

Participles

- **Present participles (verb + -ing)** describe what someone or something is.

*It was an exciting story.*

(How was the story? Exciting.)

- **Past participles** describe how somebody feels.

*The children are excited about our trip to Disneyland.*

(How do they feel? Excited.)
Remember!
The participle and the rest of the sentence must refer to the same subject.

While playing a game on my computer, I heard a loud knock at the door.
(NOT: While playing a game on my computer, a loud knock was heard at the door.)

The **passive** is often used in the following situations:

<table>
<thead>
<tr>
<th><strong>Use</strong></th>
<th><strong>Example</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>When the person or people who do the action (the agent) are:</td>
<td><em>The car was stolen</em> at approximately 1.30 p.m. (More natural than <em>Someone stole</em> the car.)</td>
</tr>
<tr>
<td>– unknown (to avoid using a general subject, e.g. <em>they, people, someone</em>)</td>
<td><em>A man was arrested</em> in town yesterday for stealing a car. <em>The suspect will be interviewed.</em></td>
</tr>
<tr>
<td>– obvious from the context</td>
<td></td>
</tr>
<tr>
<td>– unimportant</td>
<td></td>
</tr>
<tr>
<td>To emphasise new information (which appears at the end of the sentence)</td>
<td><em>The suspect was interviewed by</em> Detective Smith. <em>This type of weapon was developed by the Americans.</em></td>
</tr>
<tr>
<td>When the action itself is more important than the agent (as in news headlines, newspaper articles, formal notices, advertisements, instructions, processes, etc.)</td>
<td><em>Several houses were destroyed</em> in the earthquake.</td>
</tr>
<tr>
<td>To avoid starting clauses with long expressions</td>
<td><em>We were surprised</em> by the number of people trying to leave the city for the long weekend. (More natural than <em>The number of people trying to leave the city for the long weekend surprised us.</em>)</td>
</tr>
<tr>
<td>To be impersonal and avoid saying who performs or is responsible for an action</td>
<td><em>Oil and gas are found</em> beneath the ground or sea. <em>I've been told</em> not to say anything. <em>A page was torn out</em> of my book.</td>
</tr>
<tr>
<td>To use a formal style (official announcements, scientific texts, etc.)</td>
<td><em>All passengers are required</em> to present their ticket to the inspector.</td>
</tr>
</tbody>
</table>
Notes:
- The present perfect continuous, past perfect continuous, future continuous and future perfect continuous tenses are not normally used in the passive.
- In everyday speech the verb to get can be used instead of to be to talk about things that happen by accident or unexpectedly: Mary's cat got run over by a car. (Instead of: Mary's cat was run over ...)
- Use 'by' + the agent (to say who performed the action).
- Use 'with' + instrument / material / ingredient (to say what the agent used).
- A preposition following a verb in an active sentence is placed immediately after the verb in the passive.
  - Active: A dog bit Alan on the leg.
  - Passive: Alan was bitten on the leg by a dog.
- The verbs hear, help, see, make in the active: VERB + BARE infinitive (without to)
  - (e.g. Mum made me tidy my desk.)
- The verbs hear, help, see, make in the passive: VERB + FULL infinitive (with to)
  - (e.g. I was made to tidy my desk by Mum.)
- Let becomes be allowed to in the passive.
  - Active: Our Art teacher let us share our paints.
  - Passive: We were allowed to share our paints by our Art teacher.

Transitive (which take objects) and Intransitive Verbs (without objects)

Some verbs are not normally used in the passive. They include:

1) **intransitive verbs**, such as appear, arrive, die, grow, happen, laugh, sleep, walk, work, stand up, speak, etc., e.g.:
   - **Active**: Tony arrived at the cinema.
   - **No passive form**: The cinema was arrived at by Tony on time. (incorrect)

2) many verbs used statively, such as consist, deserve, look, mind, realize, suit, have, exist, seem, fit, suit, resemble, let, lack, etc., e.g.:
   - **Active**: You resemble your mum.
   - **No passive form**: Your mum is resembled by you. (incorrect)

Direct & Indirect Objects

Some verbs in active sentences can be followed by both a direct and an indirect object (usually a person). Common verbs include: bring, buy, cost, get, leave, lend, make, offer, owe, pass, pay, promise, read, refuse, send, show, sing, take, teach, tell, throw, write, etc.

**Active**
we can put the indirect object either immediately after the verb, or at the end of the sentence with a preposition (for/to, etc.)

<table>
<thead>
<tr>
<th>Form</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>subject + verb + indirect object + direct object</td>
<td>Michael gave Jill the plane tickets.</td>
</tr>
<tr>
<td>subject + verb + direct object + preposition + indirect object</td>
<td>Michael gave the plane tickets to Jill.</td>
</tr>
</tbody>
</table>
When an active verb has two objects we can form two different passive sentences:

<table>
<thead>
<tr>
<th>Passive</th>
</tr>
</thead>
<tbody>
<tr>
<td>either an indirect object or a direct object can be the subject of the passive sentence</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>With indirect object as subject of passive verb (more common)</th>
<th>Jill was given the plane tickets (by Michael).</th>
</tr>
</thead>
<tbody>
<tr>
<td>With direct object as subject of passive verb</td>
<td>The plane tickets were given to Jill (by Michael).</td>
</tr>
</tbody>
</table>

**Personal / Impersonal Passive Constructions**

To express other people’s opinions we can use special forms of the passive. They can be used with the verbs like believe, say, feel, hope, etc. in the following personal and impersonal passive constructions:

<table>
<thead>
<tr>
<th>Form</th>
<th>Common verbs</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject + passive + to-infinitive / perfect infinitive (personal construction)</td>
<td>agree, assume, believe, claim, consider, estimate, expect, feel, find, guarantee, know, mean, presume, regard, report, say, suppose, think, understand</td>
<td><strong>Tourism is expected to become a major part of the country’s economy.</strong></td>
</tr>
<tr>
<td>There + passive + to-infinitive / perfect infinitive (impersonal construction)</td>
<td>accept, agree, argue, assume, believe, calculate, claim, consider, estimate, expect, feel, know, presume, report, say, suggest, suppose, think, understand</td>
<td><strong>There are reported to have been a record number of accidents on the roads this year.</strong></td>
</tr>
<tr>
<td>It + passive + that clause (impersonal construction)</td>
<td><strong>It is thought that the new railway will provide employment opportunities for local people.</strong></td>
<td></td>
</tr>
</tbody>
</table>

**Causative Form**

| Causative: have / get + object (thing) + past participle (have / get something done) |
| --- | --- |
| Actions we arrange for other people to do for us (= we don’t have to do it ourselves, somebody else does it for us) | **Did you finally get your bike fixed?**  
You ought to get your blood pressure checked.  
**We had a large wedding cake made.**  
We’ve just **had the air-conditioning installed.**  
We **are having a new cooker put in tomorrow.** |
| Can be used instead of the passive to refer to unpleasant situation which hasn’t been arranged (e.g. accidents, misfortunes, and other negative and not intended things) | **I had my wallet stolen last night.** (= My wallet was **stolen** last night)  
**He had his house broken into last week.**  
We **had our herb garden vandalised while we were away.** |

**NB** in this case we use have but not get

| Causative: have + object (person) + bare infinitive / get + object (person) + full infinitive (have somebody do something / get somebody to do something) |
We use this pattern to mean we “make, persuade or cause somebody to do for us”

**NB**

- get + object (somebody) + full infinitive (to do something) = to persuade sb else to do sth
- make + object (somebody) + bare infinitive (do something) = to insist that sb do sth

*I’ll have my assistant bring / get my assistant to bring you a copy. Why don’t you get the chef to prepare / have the chef prepare you a vegetarian meal? Did you get Alex to drive you all the way to London? Mum made us do all our homework before going to the park.*

**Causative : get + past participle**

We use this pattern to mean “become”

*She got dressed and went downstairs.*

</tbody>
</table>

**Notes:**
- In general, *get* is more informal than *have* in causative structures.
- We can use other verbs instead of *get* and *have* with a causative meaning. They include *need*, *want*, and *would like*.
  (e.g. *I’d like those cars washed by this evening, please.*)
- To form negation and question in the causative, use *do/does* (present simple) or *did* (past simple).
- To refer to the agent, use *by*; to refer to instruments or materials, use *with*.
- We use other prepositions after some past participles that are used like adjectives 
  (e.g. *I am frightened of driving on motorways. My car is covered in dirt.*)
- The structure *get sth done* can also mean “finish doing something”.
  (e.g. *We’ll set off as soon as I’ve got the car fixed.*)

Forms with Modals

- **Modal + be + -ing** expresses an action in progress now (e.g. *She may be sleeping.*)
- **Modal + have been + -ing** expresses an action in progress in the past. (e.g. *He may have been working.*)
- **Modal + have + past participle** expresses a complete action in the past. (e.g. *She shouldn’t have shouted at Tim yesterday.*)

NB!

**Be able to** can be used for other tenses, too.

(e.g. *I’ve been able to play the piano since I was five.* (present perfect))

**Could** and **might** are not used to give permission.

(e.g. *“Could I go home now? – Yes, you can/may.”* NOT: *Yes, you could*)

We usually use **be allowed to** to talk about permission for one particular action in the past.

(e.g. *We were allowed to work together on our History project.*)

NOT: *We could work together on our History project.*

We often use **could** to talk about permission in the past in reported speech.

(e.g. *“You can/are allowed to work together on your History project,” the teacher said.* The teacher said we could work together on our History project.

**Had to** is the past form of both **must** and **have to**.

(e.g. *She must go to the dentist’s today.* (present)

*She had to go to the dentist’s yesterday.* (past))

**Must** and **have to** have different meanings in questions.

(e.g. *Must I eat all my vegetables? = Do you insist that I eat all my vegetables?*

*Do I have to eat all my vegetables? = Is it necessary for me to eat all my vegetables?*)

**Must** is never used as an infinitive. In this case, we use to have to.

(e.g. *I’d hate to have to move from this city.*)

NOT: *I’d hate to must move from this city.*)

We use **should /ought** to to give advice, but we use **must** to give strong advice.

(e.g. *“You should/ought to go out more often,” my friend said to me.* (advice which may or may not be followed).

*“You must take vitamin C”, the doctor said to me.* (advice that is likely to be obeyed))

**CLASSES**

**Relative Clauses**

Relative clauses give more information about the person, thing, place, etc. that we are talking about. They are introduced by the following relative pronouns and adverbs:

<table>
<thead>
<tr>
<th>Relative Pronoun</th>
<th>Use</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>who</td>
<td>to refer to people (and animals when we want to give them personality)</td>
<td>There are a lot of people who hate injections.</td>
</tr>
<tr>
<td>which</td>
<td>to refer to things, concepts, and animals</td>
<td>Did you see the film which was on TV last night?</td>
</tr>
<tr>
<td>whom</td>
<td>to refer to people as the object of the relative clause (mainly in formal contexts; and directly after a preposition)</td>
<td>That is the consultant with whom I spoke.</td>
</tr>
<tr>
<td>that</td>
<td>a more informal word for who, which, when, where, why; only used in defining relative clauses</td>
<td>This is the prescription that the doctor gave me.</td>
</tr>
<tr>
<td>when</td>
<td>to refer to time; = in/on/etc. which</td>
<td>Do you remember the day when we met?</td>
</tr>
<tr>
<td>where</td>
<td>to refer to place or situation; = in/at/etc. which</td>
<td>The neighbourhood where he lives is quite.</td>
</tr>
<tr>
<td>why</td>
<td>to refer to reasons; often after the word reason; = the reason for which; only used in defining relative clauses</td>
<td>That’s (the reason) why I don’t like violent TV programmes.</td>
</tr>
<tr>
<td>whose</td>
<td>the possessive of who and which; can also come after a preposition</td>
<td>That’s the house the windows of which/whose windows were broken.</td>
</tr>
</tbody>
</table>
what = the things which; only used in defining relative clauses

What I don’t understand is why she didn’t take her pills.

There are two types of relative clause: defining relative clauses and non-defining relative clauses:

### Defining relative clauses

Identify which person, thing, place, etc. we mean exactly. We cannot leave the relative clause out of the sentence because without it, the sentence would sound incomplete.

This is the car that I saw here yesterday.

- We do not use a comma or commas:
  The young man who lives next door has a dog. (= The relative clause explains who I’m talking about. Without it, the listener won’t know who I’m referring to.)
- We can use that instead of who/which/etc. (more formal):
  That’s the doctor that did Karen’s operation.
- We can leave out the relative pronoun if it is the object of the clause (less formal):
  It’s the kind of job (which/that) I’d like to have.
- We cannot omit when, where and why:
  I’ll never forget the day when I broke my arm / I’ll never forget the day I broke my arm.
- We cannot put a number or a determiner such as some, none, much and many before of which or of whom.

### Non-defining relative clauses

Give additional information about the person, thing, place, etc. we are talking about and is not essential to the meaning of the main sentence. A sentence would still make sense if we remove the non-defining relative clause.

The summer here, which I don’t like, lasts for months.

- We use a comma or commas to separate it from the main clause:
  The young man, who lives next door, has a dog. (= The listener knows who “the young man” is. The relative clause is extra information.)
- We cannot use that instead of who/which/etc.
- We cannot leave out the relative pronoun:
  Dr Lake, who is my uncle, is 50 years old.
- We don’t use why, but where and when cannot be omitted:
  Harley Street, where she was born, is famous for its clinics.
- We can put a number or a determiner such as some, none, much and many before of which or of whom.
  I bought some drugs, some of which were expensive.

The table below shows how relative pronouns are used in these two types of relative clause:

<table>
<thead>
<tr>
<th></th>
<th>Subject</th>
<th>Object</th>
<th>Possession</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Defining relative clause</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Used for People</td>
<td>who/that</td>
<td>who/whom/that</td>
<td>whose</td>
</tr>
<tr>
<td>Used for things/animals</td>
<td>which/that</td>
<td>which/that</td>
<td>whose</td>
</tr>
<tr>
<td><strong>Non-defining relative clause</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Used for People</td>
<td>who</td>
<td>who/whom</td>
<td>whose</td>
</tr>
<tr>
<td>Used for things/animals</td>
<td>which</td>
<td>which</td>
<td>whose</td>
</tr>
</tbody>
</table>
Notes:
- **Prepositions** in relative clauses can be placed:
  1) at the end of the relative clause *(usual)*
  Miss Berry was the person *who/that* I sent the letter to.
  2) relative pronouns can be omitted *(more usual)*
  *Is this book (which/that) you were looking for?*
  3) before the pronoun *(very formal – not usual)*
  Miss Berry was the person *to whom* I sent the letter.
  *Is this book *for which* you were looking?*
- **Which** can refer to the whole preceding (main) clause, rather than preceding noun (relative clause is separated from the preceding main clause with a comma):
  *She had lied to him, which made him furious.* (= which refers to *She had lied to him.*)
- **Whom, which, whose** can be used in expressions of quantity with **OF** *(some of, many of, half of, etc.)*:
  *We read many new articles. Many of them were informative.*
  *We read many *new articles, many of which* were informative.*

**NB**
Suggest / advise / recommend + *that*-clause

He *advised that I should* work hard. (*we can use *infinitive* He advised me to work hard).
He *suggested that I work / should* work hard. (*we can use *–ing form* He suggested working hard.
NOT He suggested to work hard.)
He *recommended that I apply / should* apply for that job. (*we can use *–ing form* He recommended booking a trip through a travel company).

**Whatever, whichever, etc.**

We use whatever, whichever, whoever, wherever and whenever to talk about a person, thing, place, etc., when it does not matter who, what, which, when, where, etc. *Whichever* usually comes before a noun; whatever, whoever and whenever usually come before a clause:

<table>
<thead>
<tr>
<th>Things / Actions</th>
<th>whichever</th>
<th>whatever</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>Buy whichever book you want.</em> (= any book you want)</td>
<td><em>Whatever she can do to help, she will.</em> (= anything she can do)</td>
<td></td>
</tr>
<tr>
<td>People</td>
<td>whoever</td>
<td>Invite whoever you like. (= anyone)</td>
</tr>
<tr>
<td>Places</td>
<td>wherever</td>
<td>I’ll go wherever I like. (= to any place)</td>
</tr>
<tr>
<td>Time</td>
<td>whenever</td>
<td>Come whenever you like. (= at any time)</td>
</tr>
</tbody>
</table>

**TIME CLAUSES**

We use the following *time conjunctions* to introduce time clauses:

*when, as, while, before, after, since, until/till, whenever, as long as, by the time, as soon as, the moment (that), no sooner .... than, hardly .... when, once, immediately, the fist/last/next time, etc.*
Notes:

• When the time clause precedes the main clause a comma is used

**Whenever she has time,**

<table>
<thead>
<tr>
<th>time clause</th>
<th>main clause</th>
</tr>
</thead>
<tbody>
<tr>
<td>she writes stories</td>
<td>whenever she has time</td>
</tr>
</tbody>
</table>

• *will /would* are never used in *time clauses*

> Come to my office *as soon as you arrive.* *(NOT: ... as soon as you will arrive.)*

• *when* *(time conjunction) + present / past*

> I'll buy some fruit *when I go to the market.*

• *when* *(question word) + will/would*

> We don’t know when she’ll be home this evening.

---

**CLASSES OF PURPOSE**

Clauses of purpose are used to explain why somebody does something.

We can express **positive purpose** using:

- **to + infinitive**
  
  Rachel phoned the box office to book the tickets.

- **in order to / so as to + infinitive** *(formal)*
  
  She bought a laptop computer in order to work at home.

- **so that + can/will** *(present/future reference)*
  
  He works hard so that he can support his family.

- **so that + could/would** *(past reference)*
  
  We took a taxi so that we could get to the airport on time.

- **in case + present tense** *(present or future reference)*
  
  Take some sandwiches in case you get hungry.

- **in case + past tense** *(past reference)*
  
  She had taken some money with her in case she needed it.

**NB:** *in case* is never used with *will* or *would.*

- **for + noun** *(expresses the purpose of an action)*
  
  I’ve sent them a card for their anniversary.

- **for + -ing form** *(expresses the purpose of something or its function)*
  
  CD Roms are used for storing information.

- **with a view to + -ing form**
  
  Jack bought an old house with a view to renovating it.

We can express **negative purpose** using:

- **in order not to / so as not to + infinitive**
  
  She had some breakfast so as not to be hungry.

  **NB:** We never use *not to* to express negative purpose.

- **prevent + noun/pronoun (+from) + -ing form**
  
  Seat belts prevent drivers (from) having serious injuries.

- **so that + could/would** *(past reference)*
  
  We took a taxi so that we could get to the airport on time.

- **so that + can’t / won’t** *(present/future reference)*
  
  I’ll take some notes so that I won’t forget the important information.

- **in case** *(past tense)*
  
  He turned the music down so that he wouldn’t wake the baby.
CLauses of reason are used to express the reason for something. They are introduced with the following words/expressions: because, as/since, the reason for/why, because of/on account of/ due to, now that, for, etc.:

<table>
<thead>
<tr>
<th>Clause Type</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>because</td>
<td>I turned on the heating because it was cold.</td>
</tr>
<tr>
<td></td>
<td>Because it was cold, I turned on the heating.</td>
</tr>
<tr>
<td>as/since (= because)</td>
<td>We couldn't go out as/since it was raining. As/since it was raining, we couldn't go out.</td>
</tr>
<tr>
<td>the reason for + noun/-ing form</td>
<td>The reason for his delay was the heavy traffic.</td>
</tr>
<tr>
<td></td>
<td>The reason for his being delayed was the heavy traffic.</td>
</tr>
<tr>
<td>the reason why + clause</td>
<td>The heavy traffic was the reason why he was delayed.</td>
</tr>
<tr>
<td>because of/on account of/ due to + noun</td>
<td>All flights were cancelled because of/on account of/ due to the thick fog.</td>
</tr>
<tr>
<td>because of/on account of/ due to the fact that + clause</td>
<td>She was thrilled because of/on account of/ due to the fact that she won the competition.</td>
</tr>
<tr>
<td>now (that) + clause</td>
<td>Now (that) she has a driving license, she can drive to work.</td>
</tr>
<tr>
<td>for (= because) (informal written style)</td>
<td>He couldn't read the small print, for his eye sight was poor. NB! A clause of reason introduced with for always comes after the main clause.</td>
</tr>
</tbody>
</table>

Clauses of result are used to express result. They are introduced with the following words/expressions:

<table>
<thead>
<tr>
<th>Clause Type</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>as a result/therefore/ consequently/as a consequence</td>
<td>We want to go on holiday. As a result/ Therefore/ Consequently/As a consequence, we are saving up money.</td>
</tr>
<tr>
<td>So</td>
<td>I was feeling ill, so I went to the doctor's.</td>
</tr>
<tr>
<td>such a/an + adjective+ singular countable noun</td>
<td>It was such a great performance that we want to see it again.</td>
</tr>
<tr>
<td>such + adjective + plural/uncountable noun</td>
<td>They are such nice people that I am going to invite them to my party. He gave us such good advice that we solved the problem.</td>
</tr>
</tbody>
</table>
| **such a lot of** + plural/uncountable noun | There were *such a lot of books* on my desk that I couldn’t work.

<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>so</strong> + adjective/adverb</td>
<td>The story was <em>so boring</em> that the students lost interest.</td>
</tr>
<tr>
<td><strong>so</strong> + adjective + a(n)+ noun</td>
<td>He was <em>so clever a boy</em> that he passed all his exams.</td>
</tr>
</tbody>
</table>
| **so much/little** + uncountable noun    | There is *so much pollution* in the city that John wants to move.  
Pual has got *so little time* that he can’t go out this weekend. |
| **so many/few** + plural noun            | There were *so many people* at the performance that there was standing room only.  
She had *so few friends* that she often felt lonely. |

### CLAUSES OF CONCESSION

Clauses of concession are used to express a contrast. They are introduced with the following words/expressions:

<table>
<thead>
<tr>
<th><strong>but</strong></th>
<th>He was ill, <em>but</em> he still went to work.</th>
</tr>
</thead>
</table>
| **although/even though/through** + clause| *Although/Even though/Though* we wore scarves and gloves, we were cold.  
*We were cold although/even though/through* we wore scarves and gloves.  
*We were cold. We wore scarves and gloves, though.* |
| **in spite of /despite** + noun/ -ing form| *In spite of /Despite our hard work,* we didn’t finish on time. *We didn’t finish on time in spite of/despite working hard.* |
| **in spite of/despite** + the fact + clause | *In spite of /Despite the fact that he was rich,* he wasn’t happy. |
| **however/nevertheless**                  | He wasn’t invited to the party.  *However/Nevertheless,* he turned up.  
**NB:** A comma is always used after *however/nevertheless.* |
| **while/whereas**                         | She is artistic, *while/whereas* her brother is more practical.  |
| **yet** (formal)/still                    | The sun was shining, *yet* it was rather warm.  
*My grandfather is 90. Yet, he is still* able to look after himself. |
| **on the other hand**                     | *I would like to eat at a fancy restaurant. On the other hand,* I can’t afford it. |

**Notes:**

- *Even though* is more emphatic than *although.*
- *Though* is informal and is often used in everyday speech. It can also be put at the end of a sentence.
- *In spite of/Despite* can be placed in the middle of the sentence.  
*Dan will take part in the race in spite of/despite being unfit.*
- We use the perfect -ing form to show that the action happened before the result.  
*They didn’t win, in spite of/despite having trained so hard.*
CLAUSES OF PLACE

Clauses of place are introduced with: where, wherever, everywhere, anywhere, etc.
(e.g. We'll enjoy ourselves wherever we go.)

NB Will / would are never used in clauses of place.

Everywhere I look I find your things. (NOT: Everywhere I will look...).

PARTICIPLE CLAUSES

**Present participles** end in -ing
**Past participles** usually end in -ed, OR V3 (irregular verbs)
**Perfect participles** = having + past participle

As an alternative passive form *(past participles)*

```plaintext
Having finished my homework, I decided to go to the cinema.
```

As an alternative conditional form *(to replace a clause of condition) *(past participle)*

```plaintext
Given the chance, I'd definitely study pharmacology. *(If I were given the chance)*
```

**Notes:**

- When the participle clause doesn't have its own subject, the clause and the rest of the sentence both refer to the same subject  
  *e.g.*  
  Standing in the hot, crowded room, I began to feel dizzy. *(= I was standing)*

  **NOT:**  
  Standing in the hot, crowded room, my head began to feel heavy. *(= my head was standing, BUT in fact IT WASN'T)*

NB
Far has two comparative and superlative forms: farther/farthest and further/furthest. We use them to talk about distances:

Chris swam to the farther/further end of the lake.

Further can also mean ‘more’ or ‘extra’. We cannot use farther in the same way:

For further information, please write to the above address. (= more information)

Old has two comparative and superlative forms: older/oldest and elder/eldest. We use elder/eldest for family members:

David’s elder son is studying law at Harvard.

We cannot use than with elder.

He is elder than me. He is older than me.

**like and as**

Note the difference between *like* and *as*: we use *like* to say that things, people, places, etc. are similar. We use *as* to say what job, duty, use or appearance somebody or something has.

- **like + noun**
  - *He runs like the wind.*
  - *Like the Greeks, Italians use olive oil a lot.*

- **like + pronoun**
  - *My brother is just like me. Like you, I’m not very keen on football.*

- **as + noun**
  - *S He works as a doctor.*
  - *As your teacher, I advise you to work harder. Don’t use your shirt as a towel!*

</tr>
<tr>
<td>• <em>We can go to either restaurant. I don't mind, (either = one or the other, it doesn't matter which one)</em></td>
</tr>
</tbody>
</table>
### Both of… / neither of… / either of…

When you use both/ neither/ either + of, you always need the…/ these/ those…/ my/ your/ his/ Tom’s… (etc.). You cannot say 'both of restaurants'. You have to say 'both of the restaurants', 'both of those restaurants' etc.:

- Both of these restaurants are very good.
- Neither of the restaurants we went to was (or were- inf.) expensive.
- I haven’t been to either of those restaurants. (= I haven’t been to one or the other) You don’t need of after both. So you can say:
  - Both my parents are from London, or Both of my parents…

You can use both of/ neither of/ either of + us/ you/them:

- (talking to two people) Can either of you speak Spanish?
- I asked two people the way to the station but neither of them knew.

You must say 'both of' before us/ you/them (of is necessary):

- Both of us were very tired, (not 'Both us were…')

After neither of… a singular (formal English) or a plural verb (informal English) is possible:

- Neither of the children wants (or want) to go to bed.

You can also use both/ neither/ either alone:

- I couldn’t decide which of the two shirts to buy. I liked both, (or I liked both of them.)
- 'Is your friend British or American?' 'Neither. She's Australian,'
- 'Do you want tea or coffee?' 'Either. I don't mind.'

**Both… and…:**

- Both Ann and Tom were late.
- I was both tired and hungry when I arrived home.

**Neither… nor…:**

- Neither Liz nor Robin came to the party.
- She said she would contact me but she neither wrote nor phoned.

**Either… or…:**

- I'm not sure where he’s from. He’s either Spanish or Italian.
- Either you apologise or I'll never speak to you again.
- Either James or I am to do it.

### No / None / Not a / Not any

**No and None:**

- We use no + noun.
- She had no shoes on.
- No information was given about how the study was conducted.
- There will be no busses until tomorrow.

**None is used without any noun after it.**

- Have we got any more sugar? There’s none in the kitchen.
- How many cats have you got? «None».

**No or none (of) is used instead of not a or not any to emphasize the negative idea in a sentence. No or none of is used but not any can’t be used in initial position in a clause or sentence.**

- No force was needed to make them move. (not any force was needed).
- None of the children was awake. (not any of the children …).
<table>
<thead>
<tr>
<th><strong>Not a:</strong></th>
<th></th>
</tr>
</thead>
</table>
| *Not a* is used in a formal or literary style. *Not a* is also used in initial position in a clause or sentence. | *Not a* word would she utter about the robbery.  
*Not a* sound came from the classroom. |
| **No:** |  |
| After *no*, a singular noun is used in situations where we would expect one of something, a plural noun where we would expect more than one.  
*Note:* Sometimes either a singular or plural with little difference in meaning can be used. | *No* answer (or answers) could be found.  
*We* want to go to the island but there's *no* boat (or *no* boats) to take us. |
| **None of:** |  |
| *None of* can be used with a plural noun and the verb can be either singular or plural, although the singular form is usually more formal. | *None of* the children were awake. *(or ...was awake).*  
*None of* the parcels have arrived yet. *(or ...has arrived yet).*  
*Note:* However, when *none* is used with an uncountable noun, the verb must be singular.  
*None of* the water was kept in the jar.  
*None of* the money has been transferred to Cuba. |
| **No amount of:** |  |
| If we want to give emphasis to *no* or *none of*, we can use phrases like *no amount of* with uncountable nouns and *not one* *(of)* with singular countable nouns. | *She* was so seriously ill that *no amount of* expensive treatment could cure her.  
*It* was clear that *no amount of* negotiation would bring the employers and workers closer together. |

### Possessives

**Basic use**

We use Possessives to express a relation, often the fact that someone has something or that something belongs to someone.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| *My diary* is the diary that belongs to me. | *Luke's* diary  
*our neighbour's* birthday |
| *my* diary, *our* neighbour, *her* birthday  
*NOT the* diary of me and *NOT the* my diary |  |
| **Determiners and pronouns**  
Possessive determiners (sometimes called 'possessive adjectives') come before a noun. |  |
|  | *all my money*  
*some of* your friends, *a lot of* his  
*one of* our neighbours |
| **NOTE**  
A possessive determiner can come after *all, both or half*, or after a quantifier + *of.* | *I'll just look in my diary.* ~ *I haven't got mine with me.*  
*NOT I haven't got my.* and *NOT I haven't got the mine.*  
*That isn't* Harriet's coat. *Hers* is blue.  
*Whose* is this pen? ~ *Yours, isn't it?* |
| We leave out the noun if it is clear from the context what we mean. When we do this, we use a pronoun. We say *mine* instead of *my diary.* |  |
| *A* possessive pronoun is often a complement. | *Is this* diary yours? *NOT IS this* diary to you?  
*That isn't* my diary — *it's* Luke's. |
| **NOTE**  
We can use the possessive form of a noun on its own. |  |
But we do not use an apostrophe with a possessive pronoun. NOT your’s

We can use yours at the end of a letter, e.g. Yours sincerely/faitfully.

REPORTED SPEECH

Reported Speech: Tense and Modal Changes

We use reported speech when we want to say what someone else said, e.g. *Jason said he was going to buy a new pair of trainers.*

If the reporting verb is in the past (e.g. *said*), we usually have to change the tense of what the person actually said.

### Conversion

Conversion involves the change of a word from one word class to another. For example, the verbs to email and to microwave are formed from the nouns email and microwave

*Can you text her?* (verb from noun text, meaning to send a text-message)

*They are always jetting somewhere.* (verb from noun jet)

*If you’re not careful, some downloads can damage your computer.* (noun from verb download)

*OK, so the meeting’s on Tuesday. That’s a definite.* (noun from adjective)

*It’s a very big if and I’m not at all sure we can afford it.* (noun from conjunction, meaning ‘it’s not at all certain’)

*All companies have their ups and downs.* (nouns from prepositions)

We also use conversion when we change a proper noun into a common noun:

*Has anybody seen my Dickens?* (copy of a book by Dickens)
### Compounding

When we use **compounding**, we link together two or more bases to create a new word. Normally, the first item identifies a key feature of the second word. **Compounds** are found in all word classes. The most common types of compounds are:

- **Nouns**: car park, rock band
- **Adjectives**: heartbreaking, sugar-free, airsick
- **Verbs**: oven-bake, baby-sit, chain-smoke
- **Adverbs**: good-naturedly, nevertheless

It is sometimes difficult to know where to put hyphens in words that are compound ed. It is also difficult to know whether to separate words (e.g. post box) or to join the words (e.g. postbox). In such cases, it is best to check in a good learner’s dictionary.

### WORD FORMATION

Use the words in brackets to form a new word that fits into the gap.
